ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and except for Abdulla Mohammad Ibrahim Hassan Abdulla, who is a resident of United Arab Emirates, all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “**Civil Procedure Code**”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

and is subject to change based on various factors, including those discussed in “*Risk Factors*” on page 23, this Letter of Offer.

The extent to which the market and industry data used in this Letter of Offer is meaningful depends on the reader’s familiarity with and understanding of the methodologies used in compiling such data. There are no standard data gathering methodologies in the industry in which the business of our Company is conducted, and methodologies and assumptions may vary widely among different industry sources.

FORWARD - LOOKING STATEMENTS

This Letter of Offer contains certain “forward-looking statements”. Forward looking statements appear throughout this Letter of Offer, including, without limitation, under the chapters titled “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” and “*Industry Overview*”. Forward-looking statements include statements concerning our Company’s plans, objectives, goals, strategies, future events, future revenues or financial performance, capital expenditures, financing needs, plans or intentions relating to acquisitions, our Company’s competitive strengths and weaknesses, our Company’s business strategy and the trends our Company anticipates in the industries and the political and legal environment, and geographical locations, in which our Company operates, and other information that is not historical information. These forward-looking statements generally can be identified by words or phrases such as “aim”, “anticipate”, “believe”, “continue”, “can”, “could”, “expect”, “estimate”, “intend”, “likely”, “may”, “objective”, “plan”, “potential”, “project”, “pursue”, “shall”, “seek to”, “will”, “will continue”, “will pursue”, “forecast”, “target”, or other words or phrases of similar import. Similarly, statements that describe the strategies, objectives, plans or goals of our Company are also forward-looking statements. However, these are not the exclusive means of identifying forward-looking statements.

All statements regarding our Company’s expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our Company’s business strategy, planned projects, revenue and profitability (including, without limitation, any financial or operating projections or forecasts), new business and other matters discussed in this Letter of Offer that are not historical facts. These forward-looking statements contained in this Letter of Offer (whether made by our Company or any third party), are predictions and involve known and unknown risks, uncertainties, assumptions and other factors that may cause the actual results, performance or achievements of our Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or other projections.

Actual results may differ materially from those suggested by the forward-looking statements due to risks or uncertainties associated with our expectations with respect to, but not limited to, regulatory changes pertaining to the industry in which our Company operates and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, the competition in our industry and markets, technological changes, our exposure to market risks, general economic and political conditions in India and globally which have an impact on our business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in laws, regulations and taxes, incidence of natural calamities and/or acts of violence. Important factors that could cause actual results to differ materially from our Company’s expectations include, but are not limited to, the following:

- There have been instances in the past of default in payment of dues to our lenders. Further, our Company has implemented a resolution plan with its lenders under the Reserve Bank of India (Prudential Framework for Resolution of Stressed Assets) Directions 2019, involving change in management from our earlier promoter, i.e. SVL Limited to our current Promoter, Mark A B Capital Investment LLC, which has led to inter alia, infusion of funds by our current Promoter, conversion of outstanding loans into long term tenor debt instruments, etc. In the event of any further defaults in making repayment of its loans or payment of interest by our Company, it may impact its continued business operation and financial condition.
- Projects included in our Order Book and our future projects may be delayed, modified or cancelled for reasons beyond our control which may materially and adversely affect our business, prospects, reputation, profitability, financial condition and results of operation.
- We derive majority of our revenue from our water and sewer segment and our financial condition would be materially and adversely affected if we fail to obtain new contracts or our current contracts are terminated.
- We are dependent on and derive a substantial portion of our revenue from a limited number of customers. Cancellation by customers or delay or reduction in their orders could have a material adverse effect on our business, results of operations and financial condition.
- We derive a major portion of our revenue from Government Customers, which exposes us to risks inherent in doing business with them and may adversely affect our business, results of operations and financial condition.

For further discussion of factors that could cause the actual results to differ from our estimates and expectations, see “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” beginning on pages 23, 121 and 212, respectively, of this Letter of Offer. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

We cannot assure investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements as a guarantee of future performance.

Forward-looking statements reflect the current views of our Company as of the date of this Letter of Offer and are not a guarantee of future performance. These statements are based on the management’s beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, our Directors, our Promoter, the LM, the Syndicate Member(s) nor any of their respective affiliates or advisors have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

In accordance with the SEBI ICDR Regulations, our Company and the Lead Manager will ensure that investors are informed of material developments from the date of this Letter of Offer until the time of receipt of the listing and trading permissions from the Stock Exchange.

History and Rationale of Resolution Plan

During the Financial Year 2019, the operations of our Company had come under severe strain due to various external and internal reasons. On August 31, 2019, the first default was recorded, which resulted in the discussions for the need of managing the stressed assets. After careful consideration, our Company in its commitment to improve its operations, had opted for the process of resolution of stressed assets as per the Reserve Bank of India (Prudential Framework for Resolution of Stressed Assets) Directions 2019 (“**Direction**”). After a series of discussion with our lenders having an aggregate non-performing exposure of ₹ 90,716.00 lakhs and canvassing the structure of our Company post the implementation of the Resolution Framework, to ensure the business of our Company continues to operate, as a going concern, the protection of the interest of the public shareholders at large and the realisation of the lenders money, all the lenders signed the inter creditor agreement dated November 28, 2019, which resulted in the formulation of Resolution Plan, with change in control and management under the Direction which was accepted by all the lenders on March 25, 2022 (“**Resolution Plan**”).

SVL Limited, our Erstwhile Promoter, opted for the Resolution plan thereby agreeing for stepping down as the promoter to keep the company as a going concern. Our Company was looking for a strategic investor both of Indian origin as well as global, who would be interested in running our business, would bring requisite funds, be acceptable to lenders and would improve the financial conditions of our Company thereby safeguarding the shareholder’s wealth. After careful consideration and series of workings at various levels, Mark A B Capital Investment LLC was identified as the strategic investor in our Company. The consortium of Banks with Punjab National Bank as the lead Bank, undertook an independent evaluation of the ability (with respect to financial and business knowledge of erection, procurement and construction segment) of Mark A B Capital Investment LLC to become the strategic investor in our Company. Once the lenders were satisfied with the credibility of Mark A B Capital Investment LLC, the Resolution Plan was approved by the lenders.

The process of strategic investment was started with the approval of all our lenders and in accordance with the Direction. The Resolution Plan was approved with certain pre conditions:

- (i) Mark A B Capital Investment LLC would infuse ₹ 35,000 lakhs, by way of issue of Equity Shares on a preferential basis by our Company, for a 26.48% stake in our Company to undertake change in management, in accordance with the Direction;
- (ii) Lenders to allow utilization of vacancy in non-fund based facilities and fund based limits already sanctioned and available to our Company, post the implementation of the plan;
- (iii) Banks to allow holding on operations till the implementation of the Resolution Plan;
- (iv) Mark AB Capital LLC, would become the promoter of our Company, consequently SVL Limited would be reclassified as a public shareholder;
- (v) Corporate Guarantee of SVL limited and SVL Trust to be replaced with the Corporate Guarantee of the Mark A B Capital Investment LLC /its affiliates;
- (vi) Conversion of ₹ 17,500 Lakhs of debt into compulsory convertible debenture (“**CCD**”) with a yield of 4 % *per annum* and convertible after fourteen (14) years; and
- (vii) Conversion of ₹ 17,500 Lakhs of debt into Non-Convertible Debenture (“**NCD**”) with a yield of 4 % *per annum* and redeemable in instalments over fourteen (14) years.

While the ability of our Company to service loans has considerably increased after implementation of the resolution plan without any default to lenders. On the occurrence of defaults if any, our lenders may initiate recovery proceedings including insolvency petitions against us and demand immediate repayment of loans from our Company, which could adversely affect our business, operations and results of operations.

2. Projects included in our Order Book and our future projects may be delayed, modified or cancelled for reasons beyond our control which may materially and adversely affect our business, prospects, reputation, profitability, financial condition and results of operation.

Our Order Book sets forth our expected revenues from uncompleted portions of the contracts received. However, project delays, modifications in the scope or cancellations may occur from time to time due to either a client's or our default, incidents of force majeure or legal impediments. For example, in some of our projects, we or our clients are obliged to take certain actions, such as acquiring land, securing right of way, securing forest clearances, securing required licenses, authorizations or permits, making advance payments or opening of letters of credit or moving existing utilities, which may be delayed due to our client's non-performance, our own breaches or force majeure factors.

In an engineering procurement and construction project ("EPC"), we may incur significant additional costs due to project delays and our counterparties may seek liquidated damages due to our failure to complete the required milestones or even terminate the construction contract totally or refuse to grant us any extension. The schedule of completion may need to be reset and we may not be able to recognize revenue if the required percentage of completion is not achieved in the specified timeframe. As at March 31, 2024 our Order Book was ₹ 95,500.00 lakhs. Our "Order Book" comprises anticipated revenues from the unexecuted portions of existing contracts (which are accepted contracts for which all preconditions have been met). The following table summarizes our Order Book by division as at March 31, 2024.

Particulars by Division	Outstanding as at March 31, 2024 (in ₹ lakhs)	Percentage of Total Order Book
Water & Sewer	88,900	93.09
Road	6,300	6.60
Process Plants	300	0.31
Total	95,500	100.00

Our Statutory Auditor has highlighted certain projects in the Audited Financial Statements, execution of which has been delayed in the past:

Details of delayed projects commented by auditors	Balance order value Rs crores	Year of Award	Period of completion
1 Ammonia Project	83	2009	36 months
2 Kerala Water Authority (KWA)-Kozhikode(R1)	34	2012	18 months
3 Kerala Water Authority (KWA)-Kozhikode(R2)	47	2012	18 months

In EPC projects, the average completion period is three (3) years, and the profit is booked on the basis of percentage of completion. Hence our anticipated revenue is equivalent to the balance order book of the ongoing projects. Further, since we book revenue on the basis of completion at various stages, therefore there is no revenue booked on completion of the order. Given below is the anticipated revenue of our Company:

Particulars	Anticipated Revenue (in ₹ lakhs)	Percentage
Water & Sewer	88,900	93.09
Road	6,300	6.60
Process Plants	300	0.31
Total	95,500	100%

As a result, our future earnings may be different from the amount in the order book. Our contracts may be amended, delayed or cancelled before work commences or during the course of construction. Due to unexpected changes in a project's scope and schedule, we cannot predict with certainty when or if expected revenues as reflected in the order book will be achieved. In addition, even where a project proceeds as scheduled, it is possible that contracting parties may default and fail to pay amounts owed or receivables due to us. If any or all of these risks materialize, our business, prospects, reputation, profitability, financial condition and results of operation may be materially and adversely affected.

3. We derive majority of our revenue from our water and sewer segment and our financial condition would be materially and adversely affected if we fail to obtain new contracts or our current contracts are terminated.

We are significantly dependent upon the water and sewer segment of our business. The revenue break-up and Order Book value in respect of our water and sewer business segment for the Financial Years 2024, 2023 and 2022 has been provided below:

(₹ in lakhs)

Particulars	Financial Year 2024		Financial Year 2023		Financial Year 2022

We bid for projects on an ongoing basis and projects are typically awarded by the Government of India / State Governments, Govt Undertakings following a competitive bidding process and satisfaction of prescribed qualification criteria. There have been instances in the past, wherein bids made by us for projects were rejected on account of a favourable position held by our competitors or our inability to meet the pricing *vis a vis* the competitors. There can be no assurance that we would be able to meet such criteria in the future, whether independently or together with other joint venture partners. In addition, we cannot assure you that we would bid where we have been qualified to submit a bid or that our bids, when submitted or if already submitted, would be accepted. A break-up of the number of the new contracts received by our Company in the Financial Years 2024, 2023 and 2022 has been provided below:

Financial year/ Period	Number of new contracts received during the period	Percentage of Order Book value in the Financial Year (in%)
2024	1	32.26%
2023	2	29.22%
2022 [^]	-	-

[^]We have commenced bidding after implementation of our Resolution Plan. Prior to such implementation, during the Financial years 2022, we did not place bids for any new tenders.

Our Company has executed various water and sewerage projects and has developed an expertise to handle turnkey engineering projects with strict adherence to deadlines and quality standards. The water and sewer business consists of the following:

- Drinking water projects
- Sewerage Treatment projects
- Rehabilitation projects

Drinking water projects generally consists of identifying water source, constructing treatment plant, laying pipes to carry water from source to treatment plant and to overhead tank and to individual houses. Sewerage treatment projects typically involves, collection of sewerage from individual houses through pipes, construction of sewerage treatment plant, laying common pipeline to carry the sewerage collected through to nearby water source to discharge the treated sewerage water. Rehabilitation projects are generally carried out in places where normal sewerage treatment project cannot be carried out. These projects involve using special imported resins pumped into the existing pipeline to form a layer and using mechanical pressure solidified resin is pushed in to form as a new pipe over the existing dilapidated pipe. Finally, the old pipe is removed and sewerage is made to pass through the newly laid resin based pipes.

The details of the top ten ongoing and completed projects undertaken in the water and sewage segment as on March 31, 2024, based on the aggregate order value has been provided below:

The water and sewage segment is dependent upon availability of water. India has about 18 percent of the world's population but only 4 percent of the world's water resources (NITI Aayog Report, 2017), making it among the most water stressed in the world. (Source: <https://www.nextias.com/ca/editorial-analysis/11-03-2024/water-crisis-in-india>) Accordingly, in the event, India faces a major water scarcity or a draught, our business and operations will be significantly impacted. A recent study conducted by Anna University and IIT-Madras revealed alarming projections about Chennai's water supply. According to the study, the gap between the city's water demand and supply is expected to widen significantly by 2030, reaching 466 million litres per day (MLD). This disparity is worsened by factors such as population growth, urbanization, and unpredictable rainfall patterns. The study highlighted the urgent need for integrated and resilient water management techniques to address this impending crisis. It emphasized that by 2030, Chennai's water demand is projected to be around 2,365 MLD, with a shortfall of 466 MLD in water supply. Another study by IIT-Madras suggested that by 2030, the city's water demand is expected to double due to climate change and population increase. This study proposed the use of tertiary treated wastewater to alleviate the pressure on freshwater sources. The findings were published in the Journal of Water Infrastructure by the International Water Association. They revealed a growing disparity between limited water sources and ever-increasing demand in Chennai. Looking ahead, the study predicts that Chennai will receive a water supply of 1,988 MLD by 2040 and 2,049 MLD by 2050. However, the unmet demand is anticipated to rise to 717.5 MLD by 2040 and a significant 962 MLD by 2050, as stated by P.V. Razi Sadath, one of the researchers involved in the study. (Source: <https://www.timesnownews.com/chennai/chennai-water-supply-to-be-interrupted-in-these-areas-on-march-15-16-check-timings-article-108489405>) In the event the southern states or other states in which we offer our services, face a water crisis, the tenders for water and sewage treatment may also decline on account of limited availability of water. Our business, growth prospects and financial performance largely depends on our ability to obtain new contracts, and there can be no assurance that we will be able to procure new contracts. Our future results of operations and cash flows may fluctuate from period to period depending on the timing of our contract. In the event we are unable to obtain new contracts, our business will be materially and adversely affected.

4. We are exposed to risks emanating from material uncertainty related to going concern

We draw attention towards the Auditors qualification in the Statutory Audit Report for the period ended March 31, 2022 wherein it was stated that the Company had incurred a net loss of ₹ 26,370.37 Lakhs during the year ended March 31, 2022 and as of that date had accumulated losses aggregating to ₹ 2,15,105.50 Lakhs which had resulted in substantial erosion of its net worth. Further, the COVID-19 pandemic had also impacted the operations resulting in delay of collection relating to project dues. Due to these events or conditions the Statutory Auditor had indicated that a material uncertainty exists that might cast significant doubt on the Company's ability to continue as a going concern. However, the Statutory auditors of our Company have removed this clause for the FY 2024 after the implementation of the restructuring plan

for borrowings, infusion of additional equity subsequent to the year end and the Management's plans to meet financial obligations in foreseeable future out of the cash flows from execution of the pipeline of orders in hand, participation in new tenders, future business plans, non-fund based facilities, and realization of trade receivables which is expected to overall improve the revenue of the Company. Further since in the past Company has faced risk relating to continuing as a going concern, we might face such instance in the future despite of our efforts. If any of these risks materialise, it could have a material adverse effect on our business, cash flows, financial condition and results of operations.

5. Our Statutory Auditor has included matter of uncertainties, emphasis of matters and qualifications, in the examination report to Restated Consolidated Financial Statements for the three years ended March 31, 2024, March 31, 2023 and March 31, 2022.

Our Statutory auditor has included the following remarks in the examination report to the Restated Financial Statements for the Financial Years ended March 31, 2024, March 31, 2023 and March 31, 2022 and the audit reports for the Financial Years ended March 31, 2024, March 31, 2023 and March 31, 2022:

Extract from the audit report on the audited consolidated financial statements for the year ended March 31, 2024:

- i. *The carrying value of the Deferred Tax Asset (DTA) balance includes an amount of Rs. 30,870.91 Lakhs as on March 31, 2024 which was recognized in regard to the unabsorbed business losses of Rs.88,343.94 lakhs. Due to the non-availability of sufficient appropriate audit evidence to corroborate management's assessment that sufficient taxable profits will be available in the future against which such unabsorbed business losses can be utilised as required by Ind AS 12: Income taxes, we are unable to comment on any adjustments that may be required to the carrying value of the aforesaid DTA on the Statement for the quarter and year ended March 31, 2024. (Refer Note 06 of the Statement).*
- ii. *Non-Current Contract Assets include overdue balances of Rs. 6,959.44 lakhs (net of provisions amounting to Rs. 926.98 lakhs) and Non-Current Trade Receivables include Rs. 575.21 lakhs (net of provisions amounting to Rs. 82.99 lakhs) as on March 31, 2024, relating to dues on projects which have been stalled due to delays in obtaining approvals from the regulatory authorities. Due to the non-availability of sufficient appropriate audit evidence to corroborate management's assessment of the recoverability of the said balances, we are unable to comment on the carrying value of these non-current Contract Assets and Trade Receivables, and the consequential impact if any, on the Statement for the quarter and year ended March 31, 2024. (Refer Note 03 of the Statement).*

Emphasis of Matter

"We draw attention to the following matters in the Notes to the Consolidated financial statements:

- a) *Note 42.1(i) of the Consolidated financial statements, which describes the implementation of Resolution Plan entered into with the lenders dated June 22, 2022, wherein interest waiver, and the difference between the carrying amounts of the facilities before restructuring and the fair values of the new facilities has been recognised as income and disclosed under Exceptional items in the statement of profit and loss in accordance with INDAS 109 - Financial Instruments.*
- b) *Note 42.1(ii) to the Consolidated financial statements, which states that the management has written off an amount of Rs. 5,819.69 Lakhs towards amounts due on account of work performed on a contract entered into with a customer which was subsequently wrongfully terminated before the completion of the contract due to certain issues at the contract site. Legal disputes / arbitration proceedings have been initiated during the period in respect of projects with the customers."*

Qualified Opinion on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

According to the information and explanations given to us and based on our audit, the following material weaknesses have been identified in the operating effectiveness of the Company's internal financial controls with reference to consolidated financial statements as at March 31, 2023

a) Provisioning of expected credit loss against contract assets and receivables which are outstanding for a substantial period of time, which could potentially result in the Company not recognizing a provision for the said assets.

b) Assessment of future taxable profits which could result in recognition of excess deferred tax asset which the Company may not be able to utilize for set-off against sufficient taxable profits. A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control with reference to consolidated financial statements, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

Extract from the audit report on the audited consolidated financial statements for the year ended March 31, 2022:

Material Uncertainty Related to Going Concern:

“We draw attention to Note 4 (e) to the consolidated financial statements, which states that the Company has incurred a net loss of ₹ 26,370.37 Lakhs during the year ended March 31, 2022 and as of that date has accumulated losses aggregating to ₹ 2,15,105.50 Lakhs which has resulted in substantial erosion of its net worth. Further, the COVID-19 pandemic has also impacted the operations resulting in delay of collection relating to project dues. These events or conditions indicates that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. However, having regard to the restructuring plan for borrowings, infusion of additional equity subsequent to the year end and the Management's plans to meet financial obligations in foreseeable future out of the cash flows from execution of the pipeline of orders in hand, future business plans, non-fund based facilities, and realization of trade receivables, the consolidated financial statements of the Company for the year ended March 31, 2022 have been prepared on a going concern basis. Our opinion is not modified in respect of this matter.”

Emphasis of Matter:

“We draw attention to Notes 43 to the Consolidated financial statements which states that the Management has made an assessment of the impact of Covid-19 on the Company's operations, financial performance and position as at and for the year ended March 31, 2022 and accordingly recognized an impairment loss of ₹ 6,361.26 Lakhs (March 31, 2021: ₹ 1,149.11 Lakhs) on financial assets and contract assets to reflect the business impact arising from the COVID 19 pandemic.”

Basis for Qualified Opinion

- “(i) The carrying value of Deferred Tax Asset (DTA) include an amount of ₹ 39,645.00 Lakhs (March 31, 2021: ₹ 43,889.00 Lakhs) which is recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management's assessment on reasonable certainty of future taxable profits, as required by Ind AS 12- Income taxes and considering the current pandemic situation, we are unable to ascertain the extent to which the deferred tax asset can be utilized. (Refer Note 44 of the Consolidated financial statements)”
- (ii) Contract Asset (Non-Current) include ₹ 3,956.02 Lakhs (Net of provisions amounting to ₹ 926.98 Lakhs) relating to project dues which is not progressing on account of Statutory delays faced by the Customer. In the absence of positive development in this matter till date, there is uncertainty on the amount that would be recoverable by the Company. Further, sufficient appropriate audit evidence to corroborate management's assessment of recoverability of the above said amount is not available. Accordingly, we are unable to comment on the carrying value of above-mentioned Contract Asset (Non-Current) and the impact if any, on account of non-provisioning of the said balance on the Consolidated financial statements. (Refer to Note 08 of the Consolidated Financial Statements)”

Qualified Opinion on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

“According to the information and explanations given to us and based on our audit, the following material weaknesses have been identified in the operating effectiveness of the Holding Company’s internal financial controls with reference to financial statements as at March 31, 2022:

- a) Provisioning of contract assets which is outstanding for a substantial period of time, which could potentially result in the Company not recognizing a provision for the said assets.
- b) Assessment of future taxable profits which could result in recognition of excess deferred tax asset which the Company may not be able to utilize.

A ‘material weakness’ is a deficiency, or a combination of deficiencies, in internal financial control with reference to financial statements, such that there is a reasonable possibility that a material misstatement of the Company’s annual or interim financial statements will not be prevented or detected on a timely basis.

In our opinion, and to the best of our information and according to the explanations given to us, the Holding Company, have in all material respects, maintained adequate internal financial controls with reference to financial statements as of March 31, 2022, based on the internal control with reference to financial statements criteria established by respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (“ICAI”) except for the possible effects of the material weaknesses described above on the achievement of the objectives of the control criteria, the internal financial controls with reference to financial statements of the Holding Company were operating effectively as of March 31, 2022.

We have considered the material weaknesses identified and reported above in determining the nature, timing, and extent of audit tests applied in our audit of the March 31, 2022 consolidated financial statements of the Company, and these material weaknesses do not affect our opinion on the consolidated financial statements of the Company.”

The Statutory Auditor has included the aforementioned emphasis of matters, matters of uncertainties and qualifications in the Restated Financial Statements as well.

There can be no assurance that any similar remarks, or matters of emphasis will not form part of our financial statements for the future fiscal periods, which could subject us to additional liabilities due to which our reputation and financial condition may be adversely affected. A bulk of our business is procured from projects undertaken by us in the infrastructure sector including water and sewerage projects, road projects, mine development projects, projects which involve, setting up of integrated steel plants, conventional thermal power plant, co-generation plants, renewable energy like wind turbines, bio mass etc. Our projects are subject to unforeseeable delays and risks. The delays may arise on account of a change in the Central and/or State Governments, changes in policies impacting the public at large, scaling back of Government policies or initiatives, changes in governmental or external budgetary allocation, or insufficiency of funds, withdrawal of sanction by multi-lateral agencies any of which can materially and adversely affect our business, financial condition and results of operations.

Some of the key risks are as follows:

Exposure to governmental clients and PSUs: As on March 2024, contracts and/or orders awarded by the Central and State Governments and PSUs in India constituted major portion of our Order Book in India. Central and State Government policies on environment-related issues may result in foreclosure of contracts. There have been instances in the past wherein the contracts awarded to us were terminated by our clients on account of non-compliance with Central and State Government policies.

Risks related to early termination of the contracts: The infrastructure contracts awarded by the Central and/or State Governments may provide the client with the right to terminate the contract for convenience, without any reason, at any time after providing us with notice, as per the time prescribed in the contract. There have been instances in the past wherein the projects undertaken by our Company were terminated by the concerned authority without attributing any reason to our Company. Our Company has in the past invoked the arbitration clause of the contract executed with the client and challenged such wrongful termination. We cannot assure you that we will be able to recover the remaining amount or any amount for any such terminated project in the future.

Performance guarantee risk: Further, performance guarantees and guarantees for advances are also common and are typically unconditional and payable on demand and may be invoked by the client without reason unless injunctions are obtained by the company. Since the majority of our projects are contracts with the Central and State Governments or public sector undertakings, we are susceptible to such termination or invocation. There have been instances in the past wherein the performance guarantee provided by our Company was invoked by our clients, which have been challenged by us by invoking the arbitration clause of the contract executed with the client. For instance, our Company invoked an arbitration clause against National Mineral Development Corporation (“NMDC”) in respect of contract value for ₹ 27,499 lakhs and made a claim of ₹ 8,486.62 lakhs including illegal encashment of bank guarantee for ₹ 2,625.01 lakhs before the sole arbitrator. NMDC filed their statement of defense with counter claim of ₹ 16,807.78 lakhs, and the arbitration is currently pending. In the event that a contract is so terminated or invoked without cause, our financial condition and operations will be adversely affected.

Delay in payments: Further, payments from the Central, State and Local Governmental authorities or the PSUs in India may be subject to several delays due to regulatory scrutiny and long procedural formalities, including any audit by the Comptroller and Auditor General of India. If payments under our contracts with the Central, State and Local Governmental authorities in India are delayed, our working capital requirements would be adversely affected, resulting in additional finance costs and increase in our realization cycle. There have been instances in the past wherein there have been significant delays in receiving payments from our clients. Any delay in payments from the central, state and local governmental authorities in India may adversely affect our financial condition and results of operations. The ageing of the outstanding debts for the

preceding three years has been provided below:

(₹ in lakhs)

Particulars	FY 24	FY 23	FY 22
Not due	12,063.46	4,590.99	4,385.20
Upto 6 months	2,314.59	2,361.98	4,128.19
6 months to 1 year	1,250.01	1,925.39	4,425.41
1-2 year	3,609.84	4,942.79	9,188.79
2-3 years	1,948.87	5,050.61	2,572.53
More than 3 years	1,696.56	5,369.34	3,357.15
Total	22,883.33	24,241.10	28,057.27

Given that we derive a significant portion of our revenue from Central and State Governments as well as government controlled entities, we are exposed to additional risks including:

- stricter regulatory requirements which may increase our compliance costs;
- delays in project implementation and key initiatives where we have invested significant costs;
- delays in payment due to the time taken to complete internal processes of such entities and agencies;
- the tender process may be cumbersome and subject to multiple levels of scrutiny resulting into significant delays and/or renegotiation of the terms of the bid or lowering the price for services included in the tender;
- political and economic factors such as pending elections, changes in leadership among key governmental decision makers, changes or delays in the implementation of government policies, changes in law, revisions in tax policies and reduced tax revenues can affect the number and terms of new government contracts signed;
- any disinvestment by the governmental entities of its shareholding in such entities could result in a change in business operations of such entities, which may impact existing or future business arrangements between our Company and such entities;
- terms and conditions of contracts, including requests for proposals and tenders tend to be more onerous and are often more difficult to negotiate than those for other commercial contracts; and
- in the event of any non-payment or delay in payment by customers, we may be unable to make payments to our third-party contractors who may initiate proceedings against our Company, which may result in an adverse impact on our business, results of operation and financial conditions.

8. EPC projects are typically awarded to us on satisfaction of prescribed pre-qualification criteria and following a competitive bidding process. Our business and our financial condition may be adversely affected if new projects are not awarded to us or if contracts awarded to us are prematurely terminated.

EPC projects are typically awarded to us following a competitive bidding process and satisfaction of prescribed technical and financial pre-qualification criteria. While track record, experience of project execution, service quality, health and safety records, qualified and experienced personnel, reputation and sufficiency of financial resources are important considerations in awarding contracts, there can be no assurance that we would be able to meet such technical and financial qualification criteria. Further, once prospective bidders satisfy the pre-qualification requirements of the tender, the project is usually awarded on the basis of price competitiveness of the bid. We generally incur costs in the preparation and submission of bids, which are one-time, non-reimbursable costs. We cannot assure you that our bids, when submitted or if already submitted, would result in projects being awarded to us.

We are pre-qualified to bid independently on projects tendered by departments of Central Government and State Government and other entities, of contract value up to ₹ 85,000 lakhs for EPC contracts based on our technical and financial capacity as on March 31, 2024. If we are not able to pre-qualify in our own right to bid for large construction and development projects, we may be required to partner and collaborate with our technical partners, for consortium bids for such projects. We may face competition from other bidders in a similar position looking for acceptable joint venture or consortium partners for pre-qualification requirements. If we are unable to partner with other suitable companies or lack the credentials to be the partner-of-choice for other companies, we may lose the opportunity to bid for large projects, which could affect our growth plans. In cases of bids in a consortium, we may also not be able to secure bids due to negligence or disqualification of our technical partners, as these factors would be beyond our control. If a

technical partner fails to perform its obligations satisfactorily, we may be required to incur additional expenditure to ensure the adequate performance and delivery of the contracted services or make payments on behalf of the technical partners, which could adversely affect the profitability of the contract.

Another factor which may impact the growth of our business is that our clients may terminate their EPC agreements for reasons set forth in these agreements. If the client terminates any of our EPC agreements, under the relevant agreement it is generally required to compensate us for the amount, depending on the valuation of the unpaid works and the timing of the termination in relation to the payment milestones associated with the respective projects, unless the agreement is terminated pursuant to applicable law or our breach of the terms of the agreement is material. Such compensation process is likely to be time consuming and the amount paid to us may not be fully compensated to us. We cannot assure you that we would receive such amounts on a timely basis or in an amount equivalent to the value of our investment plus our lost profits. While such instances have occurred in the past, any future instance of early termination of our contracts by our clients may adversely affect our business, results of operation and financial condition.

9. *Our business is substantially dependent on our ability to accurately carry out the pre-bidding engineering studies for bidding in such projects. Any deviation during the implementation and operation of the project as compared to our pre-bid engineering studies could have a material adverse effect on our cash flows, results of operations and financial condition.*

We have an in-house team experienced in engineering, cost estimation and survey. Only in exceptional cases, we appoint technical consultants to assist us in pre-bid engineering and costing.

The accuracy of the pre-bidding studies is dependent on the following key elements:

- preparing a project road map based on investigations of the project site which include amongst other, site conditions, major water bodies, indication of any notified forest, right of way details, , and any other critical local conditions;
- undertaking engineering surveys and preliminary designs which broadly include, basic pre-bid engineering, site survey, soil investigation, route survey and contour survey, logistics survey, preparation of bill of quantities, cost estimation, vendor sourcing, project planning and scheduling and cash flow projections; and
- preparation of operations and maintenance estimates wherever required..

Any deviation in the estimation and calculation of the aforementioned key elements, may hamper the quality of the pre-bid engineering study, on which we rely before submitting any tenders for the relevant project which may eventually also result in increase in the total project costs and consequently impact our margin from these projects. Accordingly, any deviation during the implementation and operation of the project as compared to our pre-bid engineering studies could have a material adverse effect on our cash flows, results of operations and financial condition.

10. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 94 of this Letter of Offer.

Further, our Promoter and members of our Promoter Group have, *vide* their letters each dated April 8, 2024 (the “**Subscription Letters**”), informed us that they may renounce their Rights Entitlement in favour of third parties. Accordingly, the minimum subscription criteria provided under Regulation 86 (1) of the SEBI ICDR

Regulations shall apply to this Issue. In accordance with Regulation 86 of the SEBI ICDR Regulations, if our Company does not receive minimum subscription of at least 90% of the Equity Shares being offered under this Issue, on an aggregate basis, our Company shall refund the entire subscription amount received within 4 (four) days from the Issue Closing Date in accordance with the SEBI Master Circular. If there is a delay in making refunds beyond such period as prescribed by applicable laws, our Company will pay interest for the delayed period at rate as prescribed under the applicable laws. Therefore, in the event our Company does not receive the minimum subscription of 90% of the total Issue Size or the subscription level falls below 90% of the total Issue Size after the Issue Closing Date on account of withdrawal of Applications or technical rejections or any other reason, our Company shall refund the entire subscription amount received within such period as may be prescribed under applicable law. On occurrence of such an event, we shall be unable to meet our capital requirements or repay the loans identified by our Company. We do not have any alternate sources of finance available, therefore in such an event we shall be forced to approach our lenders for seeking additional finance for meeting our working capital requirements and repayment obligations. Occurrence of any such events could have an adverse impact on our debt obligations, financial condition and results of operations.

11. Our projects are subject to construction, financing and operational risks along with other risks with respect to our engineering and construction business, including, without limitation, costs increase above estimates, changes in scope of work and time, cost overruns and imposition of penalties by the client, which may cause us to experience reduced profits or losses and, in some cases, cancellation or deferrals of contracts.

The construction of new projects involves various risks, including, among others, regulatory risk, construction risk, financing risk, risk due to spike in commodity prices and the risk that these projects may prove to be unprofitable. We may need to undergo certain changes to our operations as a result of entering into these new projects. Entering into any new project may pose significant challenges to our management, administrative, financial and operational resources. We cannot provide any assurance that we will succeed in any new projects we may enter into or that we will recover our investments. If the funding requirements and project costs for these projects are higher than as estimated, we will need to find sources to fund the extra costs which may not be readily available. Any failure in the development, construction, financing or operation of any of our significant new projects will likely materially and adversely affect our business, prospects, financial condition and results of operations.

We may be adversely affected by investment in the development of our ongoing and other new projects because, among others:

- the contractors hired by us may not be able to complete the construction of projects on time, within budget or to the specifications and standards set out in our contracts with them;
- delays in completion and commercial operation could increase the financing costs, including due to increase in prices of raw materials, associated with the construction and cause our forecasted budget to be exceeded;
- we may not be able to obtain adequate working capital or other financing to complete construction of and to commence operations of our projects; and
- we may not be able to recover the amounts we may have invested in our projects if the assumptions contained in the feasibility studies for these projects do not materialize.

We enter into contracts to provide services primarily on the basis of item rated contracts and/or lump sum turnkey projects per unit of work or a lump sum for the project as a whole. While typically these types of contracts include suitable escalation clauses for increases in the costs of materials and labour, there are certain contracts wherein such provision does not exist or in which the escalation clause is limited, which results in our Company bearing all or a portion of the increased costs. While we attempt to anticipate and account for any contingencies when determining our contract price, there is no assurance that we will be able to successfully secure contract prices that build in adequate amounts to cover any such contingencies. Contract prices are established in part on cost and scheduling estimates, which are based on a number of assumptions, including future economic conditions, the price and availability of labour, equipment and materials and other relevant factors. If any of these estimates prove inaccurate or circumstances change, cost or time overruns may occur and we could experience delay in realisation of the revenues and reduced profits,

or in some cases incur losses. There have been instances in the past wherein our projects have experienced time and cost overruns, any such future instances could impact our revenue, profits and financial condition.

In addition to the aforesaid, we also bear the risk of any underestimation of the amount of work or the quantity of material required. Unanticipated costs or delays in performing part of the contract can have compounding adverse effects on performing other parts of the contract.

Additionally, deviation from pre-bid estimates with respect to costs, scope of work, time overruns *etc.* can adversely impact profitability of projects and also result in our projects getting delayed. Our actual expense in executing a project under construction may vary substantially from the assumptions underlying our bid for various reasons, including, unanticipated increases in the cost of construction materials, fuel, labour or other inputs, unforeseen construction conditions, including the inability of the client to obtain requisite environmental and other approvals resulting in delays and increased costs, delays caused by local weather conditions and suppliers' failures to perform. These inherent risks of our business may result in realized gross profits differing from those we originally estimated and reduced profitability or losses. Our ability to pass on such increases in costs and expenses may be limited in the case of contracts with limited or no price escalation provisions. Depending on the size of a project, these variations from estimated contract performance could have a material adverse effect on our operating results for any particular period.

Further, there may be certain construction related faults which could typically result in revision/modification to our design and engineering thereby resulting in increased expenditure including interest costs, cost of operations on account of additional work executed towards rehabilitation and further expenditure incurred towards appointment of external consultants for assistance in revising our design. We may not be able to recover such increased costs from our customers in part, or at all, and may further be subject to penalties, including liquidated damages on account of such construction faults arising in our projects. We may further face delays in the estimated project completion schedule in respect of such projects on account of additional works required to be undertaken towards rectifying such construction faults and are dependent upon our clients permitting extension of time of completion of such projects.

There can be no assurance that any cost escalation or additional liabilities in connection with the development of such projects would be fully offset by amounts due to us pursuant to the guarantees and indemnities, if any, provided by our contractors or insurance policies that we maintain. Delays in completion and commercial operation of our projects under construction could increase the financing costs associated with the construction and cause costs to exceed our forecasted budgets. We also cannot assure you that our clients will permit such revised completion schedule to be implemented to the necessary extent or at all, and we may be held in breach of the terms and conditions of the contracts in respect of such projects pertaining to completion schedule. Further, such construction faults may result in loss of goodwill and reputation and may have a material and adverse impact our eligibility in respect of future bids made by us towards projects, thereby affecting our future operations and revenues.

Pursuant to certain agreements entered into with various clients, we may also be required to indemnify our clients against losses and damages incurred by them, including damages and penalties for delays in execution of a project. Our liability to pay liquidated damages is generally limited and capped. However, in the event we terminate any sub-contractor, due to any contractual default of their part, it may affect our results of operations and our financial condition. Additionally, we are also subject to costs associated with warranty, recall and liability due to defects in our projects or related after sales services and attendant adverse publicity. These warranties require us to cover any defects after the handover of the property to the customer for a specified period (typically 12 months). We are also required to provide performance bonds which provide that we are responsible for the completion of projects, as well as warranty bonds covering our warranties obligations after completion of a project. These actions could require us to spend considerable resources in correcting the problems and could adversely affect demand for our design and construction operations services. A failure to meet quality standards could expose us to the risk of liability claims during the project execution period when our obligations are typically secured by performance guarantees, which typically range from 5% to 10% of the contract price, and during the defects liability period, which typically runs for 12 months, from the date of handover. Any defects in our work could also result in customer claims for damages. Moreover, defects in our projects that arise from defective components supplied by external suppliers may or may not be covered under warranties provided by such suppliers. In defending claims for damages from customers, we could incur substantial costs and adverse publicity also be generated. In the

event that the defects are not rectified to the satisfaction of our customers, the customers may decide not to pay part or all of the fees under the contract, make substitute performance at our cost and/or invoke the performance or warranty bonds. During the Financial Years ended March 31, 2024, March 31, 2023 and March 31, 2022, our Company invoked an arbitration clause against National Mineral Development Corporation (“NMDC”) in respect of contract value for ₹ 27,499 lakhs and made a claim of ₹ 8,486.62 lakhs including illegal encashment of bank guarantee for ₹ 2,625.01 lakhs before the sole arbitrator. NMDC filed their statement of defense with counter claim of ₹ 16,807.78 lakhs, and the arbitration is currently pending. While, the aforementioned instances have occurred in the past, however occurrence of any future instances, could have a material adverse impact on our business, results of operations, financial condition and prospects.

12. We rely on third parties to complete certain projects and any failure arising from the non-performance, late performance or poor performance by such third parties, or failure by a third-party subcontractor to comply with applicable laws could affect the completion of our contracts, reputation and financial performance.

We are engaged as the main contractor and we further sub-contract part of our work on all of our projects. Our subcontracting cost (on a consolidated basis) for the, Fiscals ended March 31, 2024, 2023 and 2022, is as follows:

Particulars	Fiscal 2024		Fiscal 2023		Fiscal 2022	
	(in ₹ lakhs)	% of total expenditure	(in ₹ lakhs)	% of total expenditure	(in ₹ lakhs)	% of total expenditure
Sub-contracting expenses	26,214.95	44.86%	15,099.49	31.59	12,606.33	25.47

As we rely on third-party subcontractors to perform a substantial amount of the work under our contracts, our payments are dependent on, *inter alia*, the performance of the sub-contractors. We also rely on third-party equipment manufacturers or suppliers to provide the equipment and materials used for engineering and construction projects. The engagement of subcontractors is subject to certain risks, including difficulties in overseeing the performance of such subcontractors in a direct and effective manner, failure to complete a project where we are unable to hire suitable subcontractors, or losses as a result of unexpected subcontracting cost overrun. As the subcontractors have no direct contractual relationship with our clients, we are solely subject to risks associated with non-performance, late performance or poor performance by our subcontractors. While we have faced past instances of non-performance, late performance or poor performance by the third parties arising out of sub-contraction of activities, we cannot assure you that such instances would not occur in the future. The number of instances and amount involved towards invocation of performance guarantees of sub-contractors during the Financial Years ended March 31, 2024, March 31, 2023 and March 31, 2022 have been provided below:

Particulars	FY 24	FY 23	FY 22
No of instances	-	4	1
Amount involved (₹ in lakhs)	-	45.51	4.65

As a result, we may experience deterioration in the quality of our projects, inordinate delays in completion of our projects, incur additional costs, or be exposed to liability in relation to the performance of subcontractors under the relevant contracts, which may have an impact on our profitability and financial performance.

In addition, any failure of the subcontractor to comply with applicable laws, rules or regulations, to obtain the necessary approvals, or provide services as agreed in the contract or failure on our part to engage third party consultants and service providers could affect the completion of our contracts and could negatively impact our business and may result in fines, penalties or even delay and suspension of work and/or contracts. If we are unable to hire qualified subcontractors or find competent equipment manufacturers or suppliers, our ability to successfully complete a project could be impaired. If the amount we are required to pay to the subcontractors or equipment and supplies exceeds what we have estimated, especially in a fixed-price or lump-sum type contract, we may suffer losses on these contracts. If a supplier, manufacturer or subcontractor fails to provide supplies, equipment or services as required under a negotiated contract for any reason or if a subcontractor engaged by us has misrepresented its qualification or eligibility to undertake a specific project,

we may be required to source these supplies, equipment or services or a replacement for such sub-contractor (as the case may be) on a delayed basis or at a higher cost than anticipated, which could impact contract profitability. While we have faced instances of delay in execution of projects by the sub-contractor on account of delay in providing labour, equipment or services, however we haven't faced any instances of misrepresentation by sub-contractors in the past, Any misrepresentation by a subcontractor as to its qualification or eligibility may affect our ability to successfully complete a project and thereby harm our reputation.

13. Our business is working capital intensive. If we experience insufficient cash flows to meet required payments on our debt and working capital requirements, there may be an adverse effect on our operations.

Our business is working capital intensive and predominantly requires non-fund based working capital finance like letter of credit, bank guarantee, etc. in the ordinary course of its operations. The working capital requirement of our Company is based on certain assumptions, and therefore, any change of such assumptions would result in changes to our working capital requirements. In many contracts, significant amounts of non-fund based working capital are required to finance the purchase of services and materials, the performance and maintenance and other work on our projects before payment is received from clients. Our non-fund based working capital requirements may increase due to an increase in the size of our operations and the increase in credit period of any of our customers. In addition, we may need to incur additional indebtedness in the future to satisfy our working capital requirements. Details of fund based working capital of our Company during the nine-month period ended December 31, 2023 (unaudited limited review consolidated financial results) and the Fiscals ended March 31, 2023, March 31, 2022 and March 31, 2021, have been provided below:

In addition, we may need to incur indebtedness in the future to satisfy our working capital requirements. The expenditure incurred by us towards execution of our projects during the Fiscals ended March 31, 2024, March 31, 2023 and March 31, 2022, were ₹ 46,671.76 lakhs, ₹ 31,905.03 lakhs, and ₹ 29,002.23 lakhs, respectively which constituted, 83.20%, 62.35%, and 58.25%, of our total expenses for such periods, respectively, on a restated consolidated basis

In general, we may make provisions for bad debts, based primarily on ageing and other factors such as special circumstances relating to specific clients. There can be no assurance that the payments will be remitted by our clients to us on a timely basis or that we will be able to efficiently manage the level of bad debt arising from such payment practice. The bad debts and provisioning for expected credit losses for the Fiscals ended March 31, 2024, March 31, 2023 and March 31, 2022 were ₹ 10,514.45 lakhs, ₹ 723.80 lakhs, and ₹ 1,934.84 lakhs, respectively.

Further, one of the objects of this Issue include funding of working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see “*Objects of the Issue – To augment the existing and incremental working capital requirement of our Company*” on page 96. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements. Our working capital position is therefore also dependent on the financial position of our clients. All of these factors may result in increases in the amount of our receivables and short-term borrowings. Continued increases in working capital requirements may have an adverse effect on our financial condition and results of operations.

14. The Equity Shares held by one of our Promoter Group members, Mark AB Welfare Trust have been pledged as collateral security in accordance with the Resolution Plan. Subsequent to filing the exemption application Mark AB Welfare Trust has acquired 5,00,00,000 Equity Shares from SVL Limited during the Financial Year 2024. Pursuant to an order dated April 26, 2024 passed by the Securities and Exchange Board of India, Mark AB Welfare Trust had received an exemption from the obligations of open offer and for acquiring the remaining shareholding of SVL Limited. Accordingly, SVL Limited had transferred its entire shareholding aggregating to 11,35,41,894 Equity Shares to Mark AB Welfare Trust. Thereafter, Mark AB Welfare Trust has pledged a total of 18,01,46,496 Equity Shares aggregating to 12.78% of its total shareholding, in favour of the lenders of the Company.

On the occurrence of an event of default as described in the Resolution Plan and the pledge agreements, the lenders would be entitled to enforce the pledge. Any default under the said agreements may result in, *inter alia*, the lenders taking ownership of the pledged shares, selling the pledged shares to any third party purchaser, and attending and exercising voting rights in respect of the pledged shares on any matter at any meeting of the members of our Company. Upon occurrence of an event of default triggering the enforcement of the pledged securities of our Promoter, the lenders pursuant to the arrangements executed for the pledge, would be entitled to exercise rights associated with the Equity Shares pledged with it, which may indirectly impact the business and operations of our Company.

15. If our Company does not receive the minimum subscription of 90% of the total Issue Size, the Issue may fail.

Our Promoter and members of our Promoter Group have, *vide* their letters each dated April 8, 2024 (the “**Subscription Letters**”), informed us that they may renounce their Rights Entitlement in favour of third parties. Accordingly, the minimum subscription criteria provided under Regulation 86 (1) of the SEBI ICDR

Regulations shall apply to this Issue. In accordance with Regulation 86 of the SEBI ICDR Regulations, if our Company does not receive minimum subscription of at least 90% of the Equity Shares being offered under this Issue, on an aggregate basis, our Company shall refund the entire subscription amount received within 4 (four) days from the Issue Closing Date in accordance with the SEBI Master Circular. If there is a delay in making refunds beyond such period as prescribed by applicable laws, our Company will pay interest for the delayed period at rate as prescribed under the applicable laws.

In accordance with Regulation 10(4)(b) of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011, an Eligible Equity Shareholder who wishes to subscribe to additional Rights Entitlements, shall be exempt from the obligation of making an open offer under Regulation 3(2) of SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011, if (a) the Eligible Equity Shareholder has not renounced any of its Rights Entitlements in the Issue; and (b) the Issue Price shall not be higher than the ex-rights price of the Equity Shares of our Company. We shall ensure that the Issue Price is not higher than the ex-rights price of the Equity Shares of our Company.

In the event our Company does not receive the minimum subscription of 90% of the total Issue Size or the subscription level falls below 90% of the total Issue Size after the Issue Closing Date on account of withdrawal of Applications or technical rejections or any other reason, our Company shall refund the entire subscription amount received within such period as may be prescribed under applicable law. Further, in the event, there is delay in making a refund of the subscription monies, our Company shall be required to pay interest for the delayed period at such a rate prescribed under applicable law. For further details, please see “General Information - Minimum Subscription” beginning on page 88.

16. A delay and/or failure in the supply of equipment and materials from third parties at acceptable prices and quality or at all may materially and adversely affect our business, results of operations and prospects.

Our sub-contractors purchase significant amount of materials and hire equipment for executing our EPC projects. The details of the materials, equipment and services required for executing our projects have been provided below:

S. No.	Particulars	Requirement for our projects	Suppliers
1.	Equipment	Scaffolding materials, fork lift, Heavy duty cranes, road roller , vehicles for transport of men & materials etc	Local Traders /Suppliers,
2.	Materials	Pipes, cements, Steels etc	SAIL, TATA Steel, JSW Steel, Rashmi Metallics, Electro Steel Castings, Tubes & Pipes India Private Limited, TATA Metallics, Sri Kalahasthi Pipes etc.
3.	Services	Design, Survey, Engineering, Laying of Pipes, installation of Equipment, etc	Harsh Enterprises, Anand Singh, Dhiraj Traders, Vishal Constructions

Typically, the scope of our sub-contractors include purchase of material and hiring of equipment, therefore the total cost incurred towards engaging our sub-contractors include the costs relating to purchase of materials and hiring of equipment . Only in exceptional cases, we purchase equipment for a project. For instance, in one of our projects, we had to import machinery for executing the project, therefore such purchase was done by our Company, instead of our subcontractor. The cost incurred towards purchase of equipment and services (sub-contractors) (on a consolidated basis) for the Fiscals ended March 31, 2024, 2023 and 2022, is as follows:

Particulars	Fiscal 2024		Fiscal 2023		Fiscal 2022	
	(in ₹ lakhs)	% of total expenditure	(in ₹ lakhs)	% of total expenditure	(in ₹ lakhs)	% of total expenditure
Equipment	-	-	8.12	0.02	-	-
Services	46,671.76	79.86%	31,905.03	62.35	29,002.23	58.25%

The major equipment and high value materials like pipes are directly procured by the company from the client approved vendors. In most cases we enter into supply agreement with pre-determined price at the time of bidding of the project itself. Our sub-contractors procure materials such as, smaller dia pipes, cements, steels, as per the requirement of the project. Further, our Company place orders for such material at the start

of the project to reduce the risk of unavailability of material and delay in execution of our projects. Delay or failure in the supply of materials from vendors impacts the progress of our work and could thereby adversely impact operations. Procurement of material in excess of budgeted price also impacts profitability. Further, we are required to work with the suppliers who are approved by our clients, which may limit our ability to manage the suppliers. Any such failure could materially and adversely affect our business, results of operations and prospects. Our business can be adversely affected by the unavailability or fluctuating costs of the raw materials we need to construct and develop our projects, particularly steel and cement. The prices and supply of raw materials depend on factors not under our control, including general economic conditions, competition, production levels, transportation costs and import duties. Fluctuations in the prices of the underlying raw materials may also indirectly impact the prices of equipment and components procured for our operations. While these instances have occurred in the past, however any failure to obtain the raw materials we need for our projects at acceptable prices and quality or at all, in the future, would materially and adversely affect our business, results of operations and prospects.

The maintenance and management of equipment is critical for timely completion and delivery of our projects. The equipment suppliers and manufacturers assist us and our sub-contractors in timely maintenance of our equipment and also carry out repairs on our equipment, however we cannot assure you that we would be able to timely contact such equipment suppliers and manufacturers to maintain our equipment, on an urgent basis. Our operations could be disrupted if we or our sub-contractors do not successfully manage relationships with the equipment suppliers and manufacturers, if they do not perform or are unable to perform agreed-upon services, or if they are unwilling to make their services available to us at reasonable prices. We or our sub-contractors have not entered into long term contracts for maintenance of equipment, and such services are normally based on the quotes we receive from our equipment suppliers and manufacturers. Since we or our sub-contractors have no formal arrangements for maintenance of equipment, the equipment suppliers and manufacturers not contractually obligated to provide their services to us or our sub-contractors and may choose to provide the same to our competitors. If our equipment suppliers and manufacturers and vendors, do not perform their service obligations, it could adversely affect our reputation, business, financial condition and results of operations. Further, an inability to maintain and adequately manage equipment which have a limited period of useful life, could have an adverse impact on our business and financial condition. There can also be no assurance that we will not experience disruptions to our operations due to disputes or other problems with our work force such as work stoppages or increased wage demands, which may adversely affect our business.

17. The failure of a technology partners to perform its obligations could impose additional financial and performance obligations resulting in reduced profits.

We typically bid for EPC projects with our technology partners, on a project specific basis. Typically, we detail our roles and responsibilities in our joint bidding documents executed with such third parties. For details of our technology partners, please refer to “*Our Business - Technology Partners*” on page 131 of this Letter of Offer.

The details of the top five completed projects undertaken with our technology partners based on the aggregate order value has been provided below:

S. No.	Details of the project	Nature of the work	Amount of the project / Contract value (₹ in lakhs)	Completed/ Ongoing	Technology Partner

The details of the revenue earned by our Company from the top two (2) technology partners during the preceding three Financial Years has been provided below:

Top two (2) technology partners	Fiscal 2024		Fiscal 2023		Fiscal 2022	
	(in ₹ lakhs)	% of revenue from operations	(in ₹ lakhs)	% of revenue from operations	(in ₹ lakhs)	% of revenue from operations
Hutti Gold Mines Co Limited	68.74	0.12%	1095.98	2.89%	651.49	1.98%
Steel Authority of India Limited–Rourkela	--	--	20.04	0.05%	54.14	0.16%

If our technology partners fail to perform these obligations satisfactorily, the joint operation may be unable to perform adequately or deliver its contracted services. In this case we may be required to make additional investments and/or provide additional services to ensure the adequate performance and delivery of the contracted services because we are subject to joint and several liabilities as a member of the joint operation in most of our projects. These additional obligations could result in reduced profits or, in some cases, significant losses for us. The inability of a technology partner to continue with a project due to financial or legal difficulties could mean that we would bear increased and possibly sole responsibility for the completion of the project and bear a correspondingly greater share of the financial risk of the project.

18. The failure of a joint venture partner to perform its obligations could impose additional financial and performance obligations resulting in reduced profits or, in some cases, significant losses from the joint venture and may have an adverse effect on our business, results of operations and financial condition. In addition to the above, we may undertake joint ventures in the future, which may be difficult to integrate and manage.

As on the date of this Letter of Offer, our Company has formed four (04) joint operations for executing EPC contracts for our customers. Shriram EPC Eurotek Environmental Private Limited, Sepc DRS ITPL JV, Mokul Shriram EPC JV and Larsen & Toubro Shriram EPC JV are the Joint Ventures of our Company. The Joint Ventures are unincorporated in nature and have been formed through a contractual arrangement between our Company and the joint venture partners. The success of these joint operations depends significantly on the satisfactory performance by our joint venture partners and fulfilment of their obligations. The share of total revenue from our joint operations to our total revenue in the Financial Year ended March 31, 2022, Financial Year ended March 31, 2023, Financial Year ended March 31, 2024, is set forth below:

Period	Share of total revenue from Joint Operations (in ₹ lakhs)	As a percentage of our total revenue (in%)
Financial Year ended March 31, 2024	335.03	0.60
Financial Year ended March 31, 2023 [^]	223.00	0.59
Financial Year ended March 31, 2022 [^]	9,325.82	28.30

[^]The decline in revenue is on account of completion of projects with joint venture partners.

The revenue earned from each of our Joint Ventures during the period indicated, has been provided below:

(₹ in lakhs)

Joint Venture	Financial Year ended March 31, 2024	Financial Year ended March 31, 2023	Financial Year ended March 31, 2022
Shriram EPC Eurotek Environmental Private Limited	34.13	121.00	698.18
Sepec DRS ITPL JV	301.35	102.00	1.99
Larsen & Toubro Shriram EPC JV	-	-	1.48
Mokul Shriram EPC JV	-	-	8624.17

The success of our joint ventures depends significantly on the satisfactory performance by our joint venture partner and fulfilment of its obligations. If our joint venture partner fails to perform their obligations satisfactorily, the joint venture may be unable to perform adequately or deliver its contracted services. In such cases we may be required to make additional investments and/ or provide additional services to ensure the adequate performance and delivery of the contracted services as we are subject to joint and several liabilities as a member of the joint venture. Such additional obligations could result in reduced profits or, in some cases, significant losses for us. The inability of a joint venture partner to continue with a project due to financial or legal difficulties could mean that we would bear increased and possibly sole responsibility for the completion of the project and bear a correspondingly greater share of the financial risk of the project. Further any disputes that may arise between us and our strategic partners may cause delays in completion or the suspension or abandonment of the project. In the event that a claim, arbitration award or judgement is awarded against the consortium, we may be responsible for the entire claim. While there have been instances in the past, however we cannot assure that our relationship with our joint venture partner in the future will be amicable or that we will have any control over their actions. The realization of any of these risks and other factors may have an adverse effect on our business, results of operations and financial condition.

25. Any inability to manage our growth in our operations in India could disrupt our business and reduce our profitability.

As we continue to grow, we must continue to improve our managerial, technical and operational knowledge and allocation of resources, and implement an effective management information system. Our revenue from operations from Fiscal 2022 to Fiscal 2024 has increased at a YoY rate of 70.28% from ₹ 32,945.65 lakhs to ₹ 56,098.28 lakhs. While we are able to execute projects through our internal accruals and external funding from our lenders, we cannot assure that our Company will have access to the liquidity or such funding in the future. Further, our business is labour intensive, which requires us to manage relationships with a greater

number of customers, suppliers, contractors, service providers, lenders and other third parties. Accordingly, there can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business and operations and training an increasing number of personnel to manage and operate the expanded business, which may result in a material adverse effect on our business, financial condition, results of operations and future prospects. In addition, the projects we undertake are increasing in scale and complexity. Accordingly, we not only maintain but are required to constantly improve project management system and supporting infrastructure, such as our information technology and human resources systems and training programs, in order to ensure that we will be able to continue to successfully execute large and complex projects on a timely basis. If we are not successful in managing our growth, our business may be disrupted and profitability may be reduced. Consequently, our business, prospects, financial condition and results of operations may be adversely affected.

26. *Our financials contain certain long-term borrowings, in relation to which the Company has issued compulsorily convertible debentures (“CCDs”) to its lenders and which may be converted into equity shares of the Company in the event of any future default.*

The said issuance has been made in accordance with the resolution plan approved by the lenders under the Reserve Bank of India (Prudential Framework for Resolution of Stressed Assets) Directions 2019 and has been approved by the Board of Directors in their meeting dated January 3, 2022 and by the Shareholders through postal ballot. The Equity Shares which shall be issued post conversion of the compulsorily convertible debentures shall be determined as per the prevailing terms of conversion between our Company and the lenders. In case of any default on the repayment by the Company, we may have to convert the CCDs into the Equity Shares to our lenders, which may have an adverse impact on our financial condition and operations of our business and the shareholding of the existing or prospective shareholders of our Company may be diluted.

27. *Our operations and our work force are exposed to various hazards and we are exposed to risks arising from construction related activities that could result in material liabilities, increased expenses and diminished revenues and have a material adverse impact on our business, financial condition, results of operations and prospects.*

Our business and operation involves inherent industrial risks and occupational hazards and are subject to hazards inherent in providing architectural and construction services, such as and including risk of equipment failure. Such inherent industrial risks and occupational hazards may not be eliminated through implementing safety measures. We are exposed to risks related to such activities, such as systems and equipment failure, industrial accidents, fire, explosion, impact from falling objects, collision, work accidents, underground water leakages, and geological hazards such as storm, hurricane, lightning, flood, landslide and earthquake and other hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage.

Environmental laws and regulations in India are stringent and while our Company strives to comply with all the applicable regulations, if environmental clearances are not obtained in a timely manner or at all, the project may not be in compliance with environmental laws and regulations and/or may be delayed and our overall operating expenses may increase, adversely affecting our business and results of operations. The impact of noise pollution from construction activities, operations and transportation at our project sites are subject to various environmental laws and regulations. Noise pollution rules seek to regulate and control the noise producing and generating sources including from industrial activity. In terms of the Environment Protection Rules, 1986, as amended from time to time, the maximum permissible sound pressure level for new diesel generator sets with rated capacity up to 1000 KVA, manufactured on or after January 1, 2005 shall be 75 dB(A) at one meter from the enclosure surface. Integral acoustic enclosure should be provided at the manufacturing stage itself. In the event that such regulations become more stringent, such as increasing the requirements for obtaining approvals or meeting government standards, this could result in changes to the infrastructure necessary for our projects and their technical requirements, increasing the costs related to changing construction methods in order to meet government standards and increasing penalties for non-

compliance. Furthermore, we may incur significant expenditure relating to operating methodologies and standards in order to comply with applicable environmental laws and regulations.

In addition, our projects may involve the handling of hazardous materials, which, if improperly handled or disposed of, could subject us to civil and criminal liabilities. The Hazardous Wastes (Management and Handling) Rules, 1989 provides for control and regulation of hazardous wastes as defined under the Rules discharged by the operations of undertakings and imposes an obligation on every occupier and operator generating hazardous waste to dispose of such hazardous wastes properly including proper collection, treatment, storage and disposal. Every occupier and operator of any facility generating hazardous waste is required to obtain an approval from the relevant state Pollution Control Board for collecting, storing and treating the hazardous waste. Further certain environmental laws provide for joint and several liability for remediation of releases of hazardous substances, rendering a person liable for environmental damage without regards to negligence or fault on the part of such person. In addition to potential liabilities that may be incurred in satisfying these requirements, we may be subject to claims alleging personal injury or property damage as a result of alleged exposure to hazardous substances. We are also subject to regulations dealing with occupational health and safety. Such laws and regulations may expose us to liability arising out of the conduct of operations or conditions caused by others, or for our own acts. Sanctions for failure to comply with these laws, rules and regulations, many of which may be applied retroactively, may include administrative, civil and criminal penalties, revocation of permits and corrective orders. While, there have not been any material instances of non-compliances in the past, occurrence of any such instances, could have an adverse impact on our business and results of operations.

Although there have been instances of employees getting injured in the past three years, however, if we fail to implement regulatory procedures or if the procedures we implement are ineffective, our employees and others may get severely injured. Further, there have been instances wherein fines and penalties have been imposed against our Company under Employee Provident Fund Act, 1952, however any failure to comply with statutory regulations pertaining health and safety, in the future may result in penalties, fines etc. against our Company. For details, please see “*Outstanding Litigation and Material Developments – Litigation Involving our Company - Litigation against our Company - Actions taken by Statutory/Regulatory Authorities*” on page 230 of this Letter of Offer. There can be no assurance that we will not become involved in future litigation or other proceedings or be held responsible in any such future litigation or proceedings relating to safety, health and environmental matters in the future, could divert management time and attention, and consume financial resources in defence or prosecution of such legal proceedings or cause delays in the construction, development or commencement of operations of our projects.

28. Any downgrade in our credit ratings may increase interest rates for refinancing our borrowings, which would increase our cost of borrowings, and adversely affect our ability to borrow on a competitive basis. We may also be subject to interest rate risk.

Credit ratings reflect the opinions of ratings agencies on our financial strength, operating performance, strategic position and ability to meet our obligations. We have received ratings from CRISIL Limited (“**CRISIL**”). For instance, we have received “CRISIL BBB-/Stable” credit rating for our term loan facilities. The credit ratings received by our Company during the Financial Years ended March 31, 2024, March 31, 2023 and March 31, 2021 have been provided below:

Particulars	FY 24	FY 23	FY 22
Credit rating	BBB -	BBB -	D

However, any downgrade in our credit ratings may increase interest rates for refinancing our borrowings, which would increase our cost of borrowings, and may have an adverse effect on our future issuances of debt and our ability to borrow on a competitive basis. Further, any downgrade in our credit ratings may also trigger an event of default or acceleration of repayment of certain of our borrowings. If any of these risks materialise, it could have a material adverse effect on our business, cash flows, financial condition and results of operations.

29. Our insurance coverage may not adequately protect us against all our losses or liabilities.

Our significant insurance policies consist of a comprehensive coverage for risks relating to accidental death, pilferage, fire and other perils, errors committed by directors and officers. We are generally required to maintain insurance coverage under our contracts in respect of construction works, plants and equipment. The details of insurance cover for the projects and assets, claims received and sum assured for the Fiscals ended March 31, 2024, March 31, 2023 and March 31, 2022 are given below:

(₹ in lakhs)

Financial Year	Insurance coverage	Claims received
2024	1,29,642.51	37.14
2023	1,53,547.00	151.03
2022	1,82,567.83	Nil

While we believe that the insurance coverage we maintain would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully on time or at all or that we will not suffer losses not covered by our policies. We are involved in large projects where design, construction or systems failures can result in substantial injury or damage to third parties. Our projects could suffer physical damage from fire or other causes, resulting in losses, including loss of rent, which may not be fully compensated by insurance. In addition, we could suffer damage due to earthquakes, floods, hurricanes, terrorism or acts of war, other natural disasters, which may be uninsurable or are not insurable at a reasonable premium. The proceeds of any insurance claim may be insufficient to cover rebuilding costs as a result of inflation, changes in regulations, environmental issues as well as other factors. Any liability in excess of our insurance payments, reserves or backup guarantees could result in additional costs, which would reduce our profits.

30. *We may not be able to obtain adequate financing or generate sufficient cash flow to meet our significant capital expenditures and liquidity requirements, which would have a material and adverse effect on our business, results of operations, financial position and prospects.*

Our EPC projects are capital intensive as well as labour-intensive, which requires us to have significant amounts of working capital. We have had, and expect to continue to have, substantial liquidity and capital resource requirements. As of March 31, 2024, we had total borrowings (current borrowings and non-current borrowings) of ₹ 45,213.91 lakhs. Further, our cash flow generated vis-à-vis the Order Book of the Company is set out below:

Particulars	As at and for the March 31, 2024	As at and for the March 31, 2023	As at and for the March 31, 2022
Cash flow generated from projects	41,167.00	28,362.05	17,920.13
Order Book	95,500	1,10,900.00	1,21,239.00
Percentage of cash flow generated (%)	41.37%	25.57%	14.97%

Our project financing is a combination of net working capital, advances from customers and bank financing. While we may approach the Consortium or the other lenders for financial commitments, these commitments are subject to a number of conditions precedent, such as completion of documentation satisfactory to parties thereto, among others. We may not be able to fulfil all or any of the conditions or agree on terms as may be required by such lenders. Accordingly, our inability to obtain financing may impair our business, results of operations, financial condition or prospects, as the case may be. Depending on the stages or phases of our various projects in our current Order Book, we may not be able to generate sufficient cash flow to meet our significant capital expenditures and liquidity requirements, which would have a material and adverse effect on our business, results of operations, financial position and prospects. In addition, a decline in our order intake or order backlog may lead to impairment of our ability to obtain financing which may consequently impair our business, results of operations, financial condition or prospects, as the case may be.

31. *We may not be able to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our businesses on time or at all. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to*

us, may adversely affect our operations.

We are subject to regulatory authorities of State Government as well as the Central Government, there can be no assurance that the consents or other approvals required from third parties, which include central, state and local governmental bodies, will be issued or granted to us in a timely manner or at all. Our Company is generally required to obtain (i) registration under Shops & Establishments Act, 1948; (ii) registration and compliances under employee welfare laws such as, Employees State Insurance Act, 1948, Employee Provident Fund Act, 1952; (iii) environmental laws such as, Environment Protection Act, 1986, e-waste (Management and Handling) Rules, 2011 and Disaster Management Act, 2005; and (iv) taxation registration and approvals such as, Central Goods and Service Tax Act, 2017 and the Income-tax Act, 1961. Certain of our licenses require renewal on a monthly basis, we have made applications before the relevant statutory authorities for renewal of such licenses, which are pending as of the date of this Letter of Offer. Even after we have obtained the required licenses, permits and approvals, our operations are subject to continued review and the governing regulations which may change. Further, certain of our contractors and other counterparties are required to obtain approvals, licenses, registrations and permits with respect to the services they provide to us. We cannot assure you that such contractors or counterparties have obtained and will maintain the validity of such approvals, licenses, registrations and permits. We cannot assure you that we or any other party will be able to obtain or comply with all necessary licenses, permits and approvals required for our power plants in a timely manner to allow for the uninterrupted construction or operation of our power plants, or at all.

Furthermore, our government approvals and licenses are subject to numerous conditions, some of which are onerous and require us to incur substantial expenditure. We cannot assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If we fail to comply with all applicable regulations, we may incur increased costs, be subject to penalties which could materially and adversely affect our results of operations. There have been instances wherein fines and penalties have been imposed against our Company under Employee Provident Fund Act, 1952, however any failure to comply with statutory regulations in the future may result in penalties, fines etc. against our Company. For details, please see “*Outstanding Litigation and Material Developments – Litigation Involving our Company - Litigation against our Company - Actions taken by Statutory/Regulatory Authorities*” on page 230 of this Letter of Offer. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, may adversely affect our operations.

32. *There have been instances of delayed-payment of statutory dues in the past.*

There have been instances in the past wherein undisputed statutory dues including goods and service tax, provident fund, employees’ state insurance, income-tax, duty of customs, cess have not been regularly deposited by our Company with the appropriate authorities and there have been delays in remittance of dues in the past. Details of such delayed payments have been provided below:

(₹ in lakhs)

Particulars	As at and for the	Delay in days	As at and for the	Delay in days	As at and for the	Delay in days

However no undisputed amount payable in respect of goods and services tax, provident fund, employees’ state insurance, income-tax, duty of custom, cess and any other statutory dues applicable to it were outstanding, at the year ended March 31, 2023, for a period of more than six months from the date they became payable. We have received show cause notices from the Income Tax Department under the Income-

Tax Act, 1961, the details of the same have been provided in the chapter titled “*Outstanding Litigation and Material Developments – Litigation Involving our Company - Litigation against our Company - Actions taken by Statutory/Regulatory Authorities*” on page 230 of this Letter of Offer. While, penalties and fines have been imposed by regulatory authorities in the past, however it cannot be assured that there will not be such instances in the future or that our Company will not commit any further delays or defaults in relation to the applicable regulatory requirements, or that any penalty or fine will not be imposed by any regulatory authority in respect to the same.

- 33. *If we cannot respond adequately to increased competition in the future, we may lose market share and our business, results of operations, financial condition and prospects may be materially and adversely affected.***

We face significant competition from our peers and owing to the nature of our business, majority of our business and procuring a project depends on bidding process, which entails intense competition. Although we have a business strategy which seeks to minimize the effects of such competition, there can be no assurance that such competition will not erode our profit margins. Projects are awarded following competitive bidding processes and satisfaction of other prescribed pre-qualification criteria. Once the prospective bidders satisfy the pre-qualification requirements of the tender, the project is usually awarded based on the price of the contract quoted by the prospective bidder. The nature of this process may cause us and other prospective bidders to lower prices for award of the contract, so as to maintain market share. While, the aforementioned events have not occurred in the past, occurrence of any such events could have a material negative effect on our financial condition, results of operations and prospects. If we are unable to bid competitively, we may fail to increase or maintain our Order Book, which would also materially and adversely affect our business, results of operations and prospects.

- 34. *Our business is subject to cyber risks and risks related to information technology systems and technology failures or advancements could disrupt our operations.***

Our business is dependent upon increasingly complex and interdependent information technology systems, including internet-based systems, to support business processes as well as internal and external communications. We use various business applications and software like SAP AWS, Microsoft Office 365, Primavera P6, Staad Pro etc. The complexity of our computer systems may make them potentially vulnerable to breakdown, malicious intrusion and computer viruses. Cyber threats are evolving and are becoming increasingly sophisticated. While we have not experienced any disruptions or failures to our information technology systems in the last three years, we cannot assure you that we will not encounter disruptions in the future. While, such events have not occurred in the past, however, any such disruption may result in the loss of key information or disruption of our business processes, which could adversely affect our business and results of operations. Control measures include designing, implementing, and continually improving security controls including adequate security incident response plans which are tested periodically. Notwithstanding the measures mentioned above, our systems are potentially vulnerable to data security breaches, whether by employees or others that may expose sensitive data to unauthorized persons.

- 35. *We are required to furnish bank guarantees/ letters of credit as part of our business. Our inability to arrange such guarantees/ letters of credit or the invocation of such guarantees/ devolvement of letters of credit may adversely affect our cash flows and financial condition. Further, we may experience delays and/or defaults in our receivables, or delay in the release of bidding guarantees, prepayment guarantees, letters of credit or retention monies which could have a material adverse effect on our results of operations and financial condition.***

Most of our engineering and construction contracts require us to commit a certain performance guarantees, and advance payment guarantee to projects prior to receiving any advances, progress or other payments from the clients in amounts sufficient to cover expenditures on projects as they are incurred as a result of providing bidding guarantees, performance guarantees and retention monies arrangements under such contracts. The nature of guarantee and letter of credit provided by our Company as part of engineering and construction contracts and the amount locked up against such guarantees and letter of credit as at March 31, 2024 has been provided below:

(₹ in lakhs)

Particulars	Amount
-------------	--------

Advance bank guarantee	13,886.79
Performance bank guarantee	16,850.88
Retention / security deposit	3684.05
Supplier bank guarantee	2,849.46
Tender / EMD bank guarantee	342.05
Letter of credit	1,22,39.64
Total	75,226.47

Delays in client payments may require us to make a working capital investment. If a client defaults in making its payments on a project on which we have devoted significant resources or if a project in which we have invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our results of operations and financial condition. Details of receivables in respect of our current projects are set forth below:

(₹ in lakhs)

Assets	Total Trade Receivables
Non-Current	17,939.50
Current	28,527.10

Securing adequate banking facilities for these guarantees is crucial for our long-term growth. However, our ability to obtain necessary funds timely and on favorable terms is uncertain, influenced by our financial health, market conditions, and our adherence to the Resolution Plan following a history of debt servicing defaults. Inability to meet these financial obligations could lead to negative cash flows and hamper our working capital needs, adversely impacting our business and operations.

36. We engage in engineering and construction of road projects in India and the roads sector in India is prone to certain regulatory hurdles and may impose financial burden on our Company.

We have undertaken road projects in India undertaken or awarded by governmental authorities and other entities funded by the GoI or state governments and continue to do so. The companies involved in the EPC business for the roads sector are prone to various risks such as delays owing to government entities not being able to acquire lands in accordance with the Land Acquisition Act, 2013 and the financial stress the companies involved in the roads sector may face due to long gestation periods and long borrowing repayment schedules. Further, there can be no assurance that the Government of India or the state governments will continue to place emphasis on the road infrastructure or related sector. In the event of any adverse change in budgetary allocations for infrastructure development or a downturn in available work in the road infrastructure sector or resulting from any change in government policies or priorities, our business prospects and our financial performance, may be adversely affected. The contracts with government entities may be subject to extensive internal processes, policy changes, government or external budgetary allocation, insufficiency of funds and political pressure, which may lead to lower number of contracts available for bidding or increase in the time gap between invitation for bids and award of the contract or lead to renegotiation of the terms of these contracts which may lead to a delay in our business operations.

37. We have incurred losses in the recent past. Continuous financial losses incurred by us may be perceived adversely by external parties such as clients and bankers, which could affect our reputation, business, financial condition and results of operation and affect our ability to repay the loans availed by our Company.

Our Company has incurred losses in the recent past, the details of which are provided below:

(₹ in lakhs)

Particulars	March,2024	March 31, 2023	March 31, 2022
Profit/(loss) after tax earned by our Company	2,278.36	(490.38)	(26,370.37)

We cannot assure you that with lower profit and lower revenue margin, we would be effectively able to service our debt obligations on time and would not commit any defaults in repayment of loans and the interest involved. Occurrence of any of the aforementioned events would adversely affect our ability to maintain adequate cash flows to meet our working capital requirements and run our business in an effective manner. Further, there can be no assurance that we will not incur losses in any future periods, or that there will not be an adverse effect on our reputation or business as a result of such losses. Such losses incurred by us may be

received adversely by external parties such as customers, bankers, and suppliers, which could affect our reputation.

- 38. *In addition to the existing indebtedness our Company, may incur further indebtedness during the course of business. We cannot assure that our Company would be able to service the existing and/ or additional indebtedness.***

As on March 31, 2024 the total fund based indebtedness of our Company is ₹ 45,213.91 lakhs, which includes the amount of the loan converted into compulsorily convertible debentures and non-convertible debentures. In addition to the indebtedness for the existing operations of our Company, we may incur further indebtedness during the course of the business. The level of our indebtedness could have several important consequences, including but not limited to the following: (i) a significant portion of our cash flow may be used towards repayment of our existing debt, which will reduce the available cash flow to fund our expenditures and other general corporate requirements; (ii) defaults of payment and other obligations under our financing arrangements may result in an event of default, acceleration of our repayment obligations and enforcement of related security interests over our assets; (iii) a substantial portion of our long term indebtedness is subject to floating rates of interest. Fluctuations in market interest rates may require us to pay higher rates of interest and will also affect the cost of our borrowings; and (iv) our ability to obtain additional financing in the future or renegotiate or refinance our existing indebtedness on terms favourable to us may be limited, which may impact our growth plans. While the ability of the company has considerably increased for serving the loans after implementation of the resolution plan, we cannot assure you that our Company will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, and levy of liquidated damages and can cause an adverse effect on our cash flows. Any failure to service the indebtedness of our Company or comply with the Resolution Plan or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations.

- 39. *We depend on certain senior managers and key employees and our inability to retain such senior managers and employees or to adequately replace them or hire additional qualified employees could adversely affect our ability to achieve our objectives and business strategy, and thereby have a material adverse effect on our business and financial performance.***

Our operating and execution capability is substantially attributable to the role played by a group of our senior management and key employees. Our future success depends significantly on the full involvement of these key executives and employees and our ability to continue to retain and recruit high-level personnel. We do not carry key man insurance. We may need to offer higher compensation and other benefits to attract and retain key personnel. Our retention efforts include selecting the right people in our hiring process through adequate screening and through hiring individuals with relevant experience, providing opportunities for employees to share knowledge with one another through training sessions and presentations and offering an attractive, competitive salary and benefits package. In addition, we also offer a performance and potential-based career growth plan aimed at retaining talented employees based on performance goals. Our inability to retain such key executives and employees, or, alternatively to adequately replace them or hire qualified new executives and employees as our business grows, could adversely affect our ability to achieve our objectives and business strategy, and thereby have a material adverse effect on our business, financial condition or results of operations.

- 40. *Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.***

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

(₹ in lakhs)

Financial Years	Consolidated Cash flows from	Amount (₹ in lacs)
2024	Operating Activities	(12,082.93)
	Financing Activities	13,001.77
	Investing Activities	(2390.92)
2023	Operating Activities	2,090.46
	Financing Activities	(614.20)
	Investing Activities	1,248.11
2022	Operating Activities	(7,199.39)
	Financing Activities	102.52
	Investing Activities	6,838.68

We may incur negative cash flows in the future which could have a material adverse effect on our business, prospects, results of operations and financial condition.

41. We may infringe on the intellectual property rights of others.

While we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we or our technology providers are infringing upon any existing third-party intellectual property rights which may force us to alter our technologies, obtain additional licenses or significantly cease some portions of our operations. We may also be susceptible to claims from third parties asserting infringement and other related claims. Regardless of whether such claims that we or our technology providers are infringing patents or other intellectual property rights have any merit, those claims could adversely affect our relationships with current or future clients, result in costly litigation, cause product shipment delays or stoppages, divert management's attention and resources, subject us to significant liabilities, require us to enter into additional royalty or licensing agreements or require us to cease certain activities. While, the aforementioned events have not occurred in the past, occurrence of any such events could have a material negative effect on our financial condition, results of operations and prospects.

An adverse ruling arising out of any intellectual property dispute could subject us to significant liability for damages, prevent us from using technologies or developing products, or require us to negotiate licenses to disputed rights from third parties. Although patent and intellectual property disputes in the technology area are often settled through licensing or similar arrangements, costs associated with these arrangements may be substantial and could include license fees and ongoing royalties, which could be prohibitively expensive. Furthermore, necessary licenses may not be available to us on satisfactory terms, if at all. While, the aforementioned events have not occurred in the past, occurrence of any such events could have a material negative effect on our financial condition, results of operations and prospects.

42. We do not own our Registered Office. Disruption of our rights as lessee or termination of the lease agreement with our lessor would adversely impact our operations and consequently, our business.

As on the date of this Letter of Offer, our Registered Office has been taken on lease by our Company, details of the same have been provided below:

We confirm that the leased premises do not pertain to erstwhile promoters or directors/KMPs or their group/associates.

The lease deed can be terminated, and any such termination could result in our Registered Office being shifted or shut down. While we have not faced major issues renewing the lease in the past, if these lease deed is not renewed or not renewed on terms favourable to us, we may suffer a disruption in our operations or increased costs, or both, which may affect our business and results of operations. For details, please refer to the chapter titled “*Our Business- Our Immovable Properties*” on page 136 of this Letter of Offer.

There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

49. The agreements executed by our Company with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors and third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. A default under this clause will result in the outstanding amounts becoming due and payable immediately. This might have an adverse effect on our cash flows, business, results of operations and financial condition.

50. *Our Company does not have any documentary evidence for the educational qualifications of Abdulla Mohammad Ibrahim Hassan Abdulla.*

Our Chairman and Non-Executive Director, Abdulla Mohammad Ibrahim Hassan Abdulla is unable to trace documents evidencing his educational qualification. 51. *Our funding requirements and proposed deployment of the Gross proceeds are based on management estimates and have not been independently appraised and may be subject to change based on factors, some of which may be beyond our control.*

Further, an amount not exceeding 25% of the gross issue proceeds are proposed to be utilized for general corporate purposes as permitted under SEBI ICDR Regulations. It is to be noted that the aforesaid deployment of proceeds towards various objects are not appraised by any institution or independent agency. Although the payment of dues to creditors will be as approved in the Resolution Plan, the payment to various categories of creditors is proposed in a manner to be decided by the Board of Directors of the Company in the best interests of the Company considering the operational requirements of our Company. Although, the deployment of the Gross Proceeds will be monitored by the Monitoring Agency, there can be no assurance that the allocation of funds for different objects proposed in the issue would serve the best interests of the Company or that the Company will be able to achieve the results it aims to achieve through the deployment of funds being raised in the rights issue.

52. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and we are required to obtain consents from certain of our lenders prior to the declaration of dividend as per the terms of the agreements executed with them. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past three years, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 156 of this Letter of Offer.

We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. Further, the industry data mentioned in this Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Letter of Offer in this context.

Accordingly, envelopes containing an Application Form and Rights Entitlement Letter should not be postmarked in the United States or otherwise dispatched from the United States or any other jurisdiction where it would be illegal to make an offer, and all persons subscribing for the Rights Equity Shares Issue and wishing to hold such Equity Shares in registered form must provide an address for registration of these Equity Shares in India.

However, Eligible Equity Shareholders who are located in jurisdictions where the offer and sale of the Rights Entitlement or Rights Equity Shares is permitted under laws of such jurisdiction and does not result in and may not be construed as, a public offering in such jurisdictions, can receive the Abridged Letter of Offer, the Application Form, the Rights Entitlement Letter and other Issue material, by making a request in this regard to our Company or to the Registrar to the Issue. The Eligible Equity Shareholders can send an email to our Company or to the Registrar to the Issue seeking Issue Materials, pursuant to which the Abridged Letter of Offer, the Application Form, the Rights Entitlement Letter and other Issue material will be sent/ dispatched only to their valid e-mail address. Additionally, Investors can access this Draft Letter of Offer, the Letter of Offer, the Abridged Letter of Offer and the Application Form (provided that the Eligible Equity Shareholder is eligible to subscribe for the Rights Equity Shares under applicable laws) on the websites of:

However, Eligible Investors can make a request for the Issue Materials in the manner provided above. However, the Companies Act, 2013 requires companies to serve documents at any address which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act, 2013 and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under the applicable laws of such jurisdictions. 55. SEBI has recently, by way of SEBI Master Circular, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars, and in this Letter of Offer.

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI Master Circular and ensure completion of all necessary steps in relation to providing/ updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 250 of this Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Master Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat

accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or suspended for debit or credit or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned / reversed / failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

56. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.*

In accordance with the circular SEBI Master Circular, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form. For details, please refer chapter “*Terms of the Issue*” on page 250 of this Letter of Offer.

57. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “*Terms of the Issue*” on page 250 of this Letter of Offer.

58. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoter or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoter and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

59. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

60. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

61. *Investors will be subject to market risks until the Equity Shares credited to the investors demat account are listed and permitted to trade.*

Investors can start trading the Equity Shares allotted to them only after they have been credited to an investor's demat account, are listed and permitted to trade. Since the Equity Shares are currently traded on the Stock Exchange, investors will be subject to market risk from the date they pay for the Equity Shares to the date when trading approval is granted for the same. Further, there can be no assurance that the Equity Shares allocated to an investor will be credited to the investor's demat account or that trading in the Equity Shares will commence in a timely manner.

62. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

63. *The trading price of our Equity Shares may be subject to volatility and you may not be able to sell your Equity Shares at or above the Issue Price.*

The trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political

and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets in general experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could adversely affect the price of our Equity Shares.

64. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

65. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

66. *Investors will not have the option of getting the allotment of Equity Shares in physical form.*

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see "Terms of the Issue" on page 250 of this Letter of Offer. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.

67. *There is no guarantee that our Equity Shares will be listed, or continue to be listed, on the Indian stock exchanges in a timely manner, or at all, and prospective investors will not be able to immediately sell their Equity Shares on the Stock Exchange.*

In accordance with Indian law and practice, final approval for listing and trading of our Equity Shares will not be applied for or granted until after our Equity Shares have been issued and allotted. Such approval will require the submission of all other relevant documents authorizing the issuance of our Equity Shares.

Accordingly, there could be a failure or delay in listing our Equity Shares on the Stock Exchange, which would adversely affect your ability to sell our Equity Shares.

68. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

69. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

70. *Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards ("IFRS"), which investors may be more familiar with and consider material to their assessment of our financial condition.*

Our summary statements of assets and liabilities and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity, as per the Financial Statements, have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Master Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Letter of Offer should accordingly be limited.

71. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India.

Demand for our products or services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

72. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

73. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian

GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- the General Anti Avoidance Rules (“GAAR”) have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- a comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

74. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors’ reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

These could include further falls in Stock Exchange's indices and greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

75. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

76. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

77. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

78. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business results of operations, cash flows and financial performance.

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. For example, the Government of India implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR which have come into effect from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us. In addition, the implementation of Ind AS is recent and new pronouncements may have a material impact on our profitability going forward and our revenue may fluctuate significantly period over period.

Further, changes in tax rates are generally covered by subsequent legislation clauses in our contracts with clients. However, the prevailing tax rate is considered during the bid stage and any claims for reimbursement from client may result in possible disputes, which could result in arbitrations/litigations for the Company and impact working capital. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas operations depending on each specific country.

79. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

80. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

S. No.	Particulars	Number of days for the period ended		
		March 31, 2023 (Actual)	March 31, 2024 (Actual)	March 31, 2025 (Estimated)
1.	Trade receivables	234	149	160
2.	Other current assets	103	76	42
3.	Inventories and Contract assets	706	598	243
4.	Trade payables	235	143	81
5.	Other current liabilities	57	61	17

Note: Post Implementation of Resolution Plan in September 30, 2022, there is infusion of fresh capital and right issue which has improved overall performance of the Company, thereby leading to efficient working capital cycle as enumerated above.

Assumptions for Working Capital Requirements

Reasoning for change in holding period of all the above:

Post implementation of Resolution plan on 30th September, 2022, all sites are coming back to normal operations and since the infusion of funds for working capital during the Fiscal 2024, an improvement in holding period has been achieved. Based on the projected infusion of further funds for working capital further improvement in holding levels has been projected.

The table below sets forth the key justifications for holding levels:

S. No.	Particulars	Details
Current assets		
1.	Trade receivables	The Company had maintained trade receivable days of 234 days in the Fiscal 2023 and 149 days for the Fiscal 2024. The Company anticipate to reduce its holding levels in trade receivables because of implementation of Resolution plan and trade receivables days to be 160 days for Fiscal 2025.
2.	Other current assets	Other Current Assets include balance with government authorities, advances to suppliers and prepaid expenses. For the Fiscal 2023 and Fiscal 2024, the Company's other current assets were 103 days and 76 days. It is anticipated to be at 42 days for Fiscal 2025. The reduction in number of days is mainly on account of the estimated increase in revenue due to the likely tenders which is attributed to be received by the Company.
3.	Inventories and Contract assets	Inventories include Contract assets. The Company had maintained inventory days of 706 days in Fiscal 2023 and in Fiscal 2024 598 days. It is assumed to reduce inventory days to 243 for the Fiscal 2025. Post implementation of RP, rate of execution has improved leading to achievement of billing milestones which in turn is the major reason for reduction in inventory holding days.
Current liabilities		
1.	Trade payables	The Company had maintained trade payable days of 235 days in Fiscal 2023 and 143 days in Fiscal 2024. It is projected to reduce due to improvement in financial efficiency and projected to be 81 days for the Fiscal 2025. Promoter loan as well as previous rights issues helped in reducing the trade payable number of days.
2.	Other current liabilities	Other Current Liabilities include current provision for employee benefits, advances from customers, and statutory dues. For the Fiscal 2023 and Fiscal 2024, the Company's other current liabilities were 57 days and 61 days respectively. It is anticipated to be at 17 days for Fiscal 2025. Promoter loan as well as previous rights issues helped in reducing the other current liabilities number of days.

- Subject to the fulfilment of prescribed conditions, for the year, the Company is entitled to claim deduction under section 80JJAA of the Act with respect to an amount equal to 30% of additional employee cost (relating to specified category of employees) incurred in the course of business in the year, for three assessment years including the assessment year relevant to the year in which such employment is provided. Further, where the Company wishes to claim such possible tax benefit, it shall obtain necessary certification from a Chartered Accountant on fulfilment of the conditions under the extant provisions of the Act.
- As per the provisions of section 80M of the Act, dividend received by the Company from any other domestic company or a foreign company shall be eligible for deduction while computing its total income for the relevant year. The amount of such deduction would be restricted to the amount of dividend distributed by the Company to its Shareholders on or before one month prior to due date of filing of its Income-Tax return for the relevant year. Since the Company has investments in Indian subsidiaries, it may avail the above mentioned benefit under section 80M of the Act.

2. Special Tax benefits available to the shareholders of the Company under the Act

Further, the benefit of lower rate is extended in case STT is not paid on acquisition / allotment of equity shares through Initial Public Offering.
- Section 111A of the Act provides for concessional rate of tax @ 15% in respect of short-term capital gains (provided the short-term capital gains exceed the basic threshold limit of exemption, where

applicable) arising from the transfer of a short-term capital asset (i.e. capital asset held for the period of less than 12 months) being an Equity Share in a company or a unit of an equity-oriented fund wherein STT is paid on both acquisition and transfer.

- Separately, any dividend income received by the shareholders would be subject to tax deduction at source by the company under section 194 @ 10%. However, in case of individual shareholders, this would apply only if dividend income exceeds INR 5,000. Further, dividend income shall be taxable in the hands of the shareholders at the rates as applicable in their case.
- In respect of non-residents, the tax rates and the consequent taxation shall be further subject to any benefits available under the applicable Double Taxation Avoidance Agreement, if any, between India and the country in which the non-resident shareholder has fiscal domicile.

INDUSTRY OVERVIEW

Global Economy

According to the International Monetary Fund (IMF), the global economy is likely to grow at 3.1 percent and 3.2 percent in the calendar years 2024 and 2025, respectively. This growth is attributed to higher performance expectations from the United States and other large developing economies, as well as fiscal support in China. However, this forecast is lower than the long-term average growth rate of 3.9 percent, which was registered between 2020 and 2019. Inflation across the world is on the higher side, so the policy rate, which was set by the central bankers to combat the sticky inflation, is also affected. The best part is that global inflation is gradually declining as a result of policy measures implemented by central banks. According to the IMF, global inflation is expected to fall to 5.8 percent in 2024 and further to 4.4 percent in 2025.

The outbreak of the Covid-19 pandemic in 2020 dealt a significant blow to global economic growth. Two years later, as countries were struggling to recover from the pandemic-induced output contraction, the Russia-Ukraine conflict erupted in 2022. This conflict triggered a surge in commodity prices and inflation thereon. In response, countries implemented monetary tightening measures to control inflation, which in turn weakened growth. Monetary tightening also led to a capital flow shift towards the safe-haven US markets, contributing to the rise in bond yields and the appreciation of the US dollar against other currencies. Consequently, borrowing costs increased, putting pressure on both public and private debt levels. The recent geopolitical turmoil in the Middle East has added to concerns. The Houthi Group in Yemen has been attacking shipping vessels in the Red Sea, causing logistical disruption in one of the world's most important waterways.

Despite the prevailing pessimism, inflation and bond yields in the US have cooled off, laying the groundwork for potential rate reversals in the future.

Indian Economy

According to the National Statistical Office (NSO), the Indian Economy is projected to grow at 7.3 percent in Fiscal Year (FY) 2024, suppressing the 7.2 percent growth recorded in FY 2023. The Finance Ministry's communication indicates that India's economy is expected to grow at 7.0 percent in FY 2025, aligning with growth projections from various international agencies such as the World Bank, the IMF, OECD, and ADB. Despite global macroeconomic challenges, the Indian economy has shown resilience and maintained healthy

macroeconomic fundamentals. The Finance Ministry has projected that India is poised to become the world's third-largest economy, with a GDP of \$5 trillion within the next three years (Source: *The Hindu*, article 'India to become third-largest economy with GDP of \$5 trillion in three years: Finance Ministry'). Currently, India holds the position as the world's fifth-largest economy, trailing behind only the US, China, Japan, and Germany.

The government is committed to fiscal consolidation, aiming to reduce the fiscal deficit target for the upcoming financial year. This entails implementing measures such as reducing spending and enhancing revenue receipts to achieve a fiscal deficit target of 5.10 percent of GDP by FY 2025. According to revised estimates, India's fiscal deficit is expected to decrease from 6.4 percent of GDP recorded in FY 2023 to 5.80 percent in FY 2024.

India's CPI inflation decreased to 5.1 percent in January 2024 from 5.7 recorded in December 2023. This decline can be attributed to a slowdown in food inflation and a higher base effect. The RBI has projected that CPI inflation will remain at 5.4 percent and 4.5 percent in FY 2024 and FY 2025 respectively, supported by improved rabi crop yields, a moderation in vegetable prices, and, the expectation of a normal monsoon in FY 2025.

The country's central bank has maintained the policy rate (repo) unchanged at 6.50 percent for the sixth consecutive time. According to the Reserve Bank of India, the transmission of interest rates is still incomplete and the interest rate has not consistently fallen below the threshold level. By opting for a status quo on interest rate, the RBI assumes that the global growth will likely to remain steady in 2024, and inflation is gradually decreasing from its multi-decade high, albeit with occasional upticks.

In its latest Monetary Policy Committee Meeting (MPC) Statement, the RBI predicts a recovery in the rabi crop, sustained profitability in manufacturing, and the underlying resilience of the services sector, which should bolster economic activity in the country. Additionally, the RBI has taken into account factors such as an improvement in household consumption, increased fixed investment in the economy driven by a turnaround in the private capex cycle, overall improvement in the business cycle and a healthy balance sheet of banks and corporate.

The Index of Industrial Production (IIP), which indicates the growth rate across various industry groups in the economy, has shown a robust rebound after the COVID-19 pandemic. Nonetheless, the index has displayed volatility throughout the first nine months of the financial year 2024, with certain sectors experiencing subdued performances.

Making India a 5 trillion USD Economy

Union Home Minister Amit Shah on 12th Nov 2022, said that India will become a \$5 trillion economy by 2025, and the third largest economy in the world by 2027. "According to a recent report by Morgan Stanley, India is set to become the third biggest economy in the world by 2027. For this, infrastructure is very important. Because of effective and transparent policies, the Modi government has achieved a lot in different sectors in the last eight years," Amit Shah said.

INFRASTRUCTURE INDUSTRY IN INDIA

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from the Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure. In other words, infrastructure sector acts as a catalyst for India's economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure and construction development projects.

In order to become a US \$5 trillion economy by 2025, infrastructure development is the need of the hour. The Government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as 'Make in India' and the production-linked incentives (PLI) scheme to augment the growth of infrastructure sector. Historically, more than 80% of the country's infrastructure spending has gone towards funding for transportation, electricity and water & irrigation. Centre's share in NIP is 39% whereas, State and Private sector's share is 39% and 22% respectively.

Under NIP, investment in Energy sector will be ₹25,000 Billion, ₹20,000 Billion in Roads, ₹16,000 Billion in Irrigation, rural, agriculture and food processing, ₹16,000 Billion in Mobility, ₹14,000 Billion in Railways, ₹3,200 Billion in Digital Infrastructure and ₹2,500 Billion in Ports & Airports.

While these sectors still remain the key focus, the Government has also started to focus on other sectors as India's environment and demographics are evolving. There is a need for enhanced and improved delivery across the whole infrastructure range, from housing to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life and boost sectoral competitiveness.

Atmanirbhar Bharat Abhiyan

On 12 May 2020, our Hon'ble PM, Narendra Modi, raised a clarion call to the nation giving a kick start to the Atmanirbhar Bharat Abhiyaan (Self-reliant India campaign) and announced the Special economic and comprehensive package of INR 20 lakh crores - equivalent to 10% of India's GDP – to fight COVID-19 pandemic in India. The aim is to make the country and its citizens independent and self-reliant in all senses. He further outlined five pillars of Aatma Nirbhar Bharat – Economy, Infrastructure, System, Vibrant Demography and Demand

Investments & Government initiatives in the Infrastructure sector in India

In order to achieve the GDP of USD 5 trillion by FY25, India needs to spend about USD 1.4 trillion over these years on infrastructure. During FYs 2008-17, India invested about USD 1.1 trillion on infrastructure. However, the challenge is to step up infrastructure investment substantially. Keeping this objective in view, National Infrastructure Pipeline (NIP) was launched with projected infrastructure investment of around ₹111 Trillion (USD 1.5 trillion) during FY 2020-2025 to provide world-class infrastructure across the country, and improve the quality of life for all citizens. It also envisages to improve project preparation and attract investment, both domestic and foreign in infrastructure. NIP was launched with 6,835 projects, which has expanded to over 9,000 projects covering 34 infrastructure sub-sectors. Some of the salient initiatives by Govt of India on infrastructure Sector is given below:

- Shri Gadkari has stated that green initiatives in construction will be taken to make country carbon neutral by 2070.
- The Ministry has undertaken development of 2,078 km of Port connectivity roads in the country, including

372 km in the State of Maharashtra to increase logistics efficiency.

- A total 27 Greenfield corridors having overall length 9860 km planned in the country. The objective behind construction of roads under Greenfield projects is to optimize the overall cost to the economy, while catering to the traffic needs of the Origin-Destination in the most efficient way, providing most efficient connectivity between key economic centres, avoiding rehabilitation and resettlement on large scale, achieving higher speed and safer roads with dedicated entry/exit points.
- Foundation stone for 11 NH projects worth ₹5600 crore have been laid in Pratapgarh, Rajasthan.
- The Asian Development Bank (ADB) approved a loan in November 2021 for US \$250 Million to support the National Industrial Corridor Development Program (NICDP). This is a portion of the US \$500 Million loan for constructing 11 industrial corridors connecting 17 states.
- With the launch of the "Infrastructure for the Resilient Island States" initiative in November 2021, India will have a significant opportunity to improve the lives of other vulnerable nations around the globe.
- Dubai and the Indian Government signed a contract in October 2021 to build infrastructure in Jammu and Kashmir, including industrial parks, IT towers, multipurpose towers, logistics centres, medical colleges, and specialized hospitals.
- For reform-based and result-linked fresh electricity distribution, the Government declared ₹ 3,059.84 Billion scheme over the next five years.
- The Mega Investment Textiles Parks (MITRA) scheme was introduced to create seven textile parks over three years and world-class infrastructure for the textile industry.
- The Ministry of Railways intends to monetize a number of assets, including the Eastern and Western Dedicated Freight Corridors once they have been put into service, the introduction of 150 modern rakes via public private partnership (PPP), station renovation via PPP, railway land parcels, multifunctional complexes (MFC), railway colonies, hill railways, and stadiums.
- **Swachh Bharat Mission (Grameen)**

The Hon'ble Prime Minister of India, Narendra Modi had launched the Swachh Bharat Mission on 2nd October 2014. Under the mission, all villages, Gram Panchayats, Districts, States and Union Territories in India declared themselves "open-defecation free" (ODF) by 2 October 2019, constructing over 100 million toilets in rural India. To ensure that the ODF behaviours are sustained, no one is left behind, and that solid and liquid waste management facilities are accessible, the Mission is moving towards the next Phase II of SBMG i.e., ODF-Plus. ODF Plus activities under Phase II of Swachh Bharat Mission (Grameen) will reinforce ODF behaviours and focus on providing interventions for the safe management of solid and liquid waste in villages

- **PLI Schemes**

Hon'ble Finance Minister, Smt Nirmala Sitharaman has announced an outlay of INR 1.97 Lakh Crores for the Production Linked Incentive (PLI) Schemes across 14 key sectors, to create national manufacturing champions and to create 60 lakh new jobs, and an additional production of 30 lakh crore during next 5 years

During the fiscals 2020 to 2025, sectors such as energy (24%), roads (18%), urban (17%), and railways (12%) amount to around 70% of the projected capital expenditure in infrastructure in India. NIP has involved all the stakeholders for a coordinated approach to infrastructure creation in India to boost short-term as well as the potential GDP growth.

Smart City Mission Projects

The 100 Smart Cities Mission in India was launched by Prime Minister Narendra Modi on June 25, 2015. Smart Cities Mission is an urban renewal and retrofitting programme launched by the Government of India to develop smart cities and make them citizen friendly and sustainable.

Water

Water resources are natural assets with significant potential utility. They are utilized across various domains, including living organisms, industries, agriculture, recreation, and environmental activities. Despite covering two-thirds of the Earth's surface, 97.5 percent of water is saltwater, leaving only 2.5 percent as freshwater. Of this freshwater, two-thirds is locked in glaciers and polar ice caps, while the remaining portion exists as groundwater. India has only 4 percent of world's renewable water resources but is the home to nearly 18 percent of world's population.

Availability of Water in India

The Department of Water Resources, Ministry of Jal Shakti, Government of India, states that the country is currently experiencing water stress, with the per capita availability of water falling below 1700 cubic meters per year. According to the Falken Mark water stress indicator, when per capita availability drops below 1700 cubic meters per year, it signifies a water-stressed condition, while dropping below 1000 cubic meters indicates water scarcity. The agricultural sector is already grappling with a water crisis, and basic needs are not being adequately met with the available water resources. Government projections suggest that India's per capita water availability will decline to 1362, 1282, and 1228 cubic meters per year by 2031, 2041, and 2051, respectively.

The agriculture sector is the largest user of water in India, accounting for approximately 80% of water use. However, the requirements for water from drinking, industry and energy use are increasing rapidly.

The quality of water is a critical issue, not just its availability. According to the Niti Ayog Report (Composite Water Management Index, June 2018), 77% of our water is contaminated, and India ranks 120th out of 122 countries in terms of water quality index. With the increasing use of water by the industry and energy sector, an enormous amount of wastewater will be generated and recycling of the same will provide opportunities to companies operating in the respective field of infrastructure.

Based on the information provided by the Central Pollution Control Board, 72,368 million litres per day (MLD) of sewage is generated from the urban area in the country, against which available treatment capacity of 31,841 MLD².

Over the years, the Government of India has introduced numerous initiatives aimed at addressing water-related challenges across the country, including programs like the Namami Gange Program, National River Conservative Plan and Jal Jeevan Mission. The Namami Ganga Program, launched in 2014 and scheduled to run until 2026, offers opportunities for infrastructure and construction companies to address issues such as wastewater management, solid waste management, and river flow regulation. As of October 2023, the Government has allocated approximately INR 16,000 crores towards this initiative since its inception in 2014. Started in 2019, the Jal Jeevan Mission stands as another landmark initiative by the government aimed at ensuring safe tap drinking water for all rural households by 2024. The scheme aims to cover 16 crore households, with an estimated outlay of INR 3.60 lakh crores, out of which Central contribution is expected to be INR 2.08 lakh crores.

As of October 01, 2023, a total of 1322.32 lakh households³ are covered under this scheme, representing an increase of 998.7 lakh households since the launch of the project on August 15, 2019.

WATER SUPPLY MANAGEMENT

The average water available per capita annually depends on the region's hydro-meteorological and geological factors. The per capita water availability in the country is reducing due to increasing population. The annual per-capita water availability is less than 1,700 cubic meters and is expected to fall to 1,367 cubic meters by 2031 according to "Reassessment of Water Availability in India using Space Inputs (2019)." As per a report by Dynamic Ground Water Resource Assessment 2022, out of 7,089 assessment units which includes blocks, talukas, mandals, watersheds, firkas in the country, 1,006 units have been categorized as 'Over-exploited'.

It is expected that by 2050, about 1,450 km³ of water will be required out of which approx. 75% will be used in agriculture, ~7% for drinking water, ~4% in industries, ~9% for energy generation. However, because of growing urbanization, the need for drinking water will take precedence from the rural water requirements. Many of the cities are situated by the bank of rivers from where the fresh water is consumed by the population and the waste water is disposed back into the river, thus causing contamination of the water source and irrigation water. This has raised serious challenges for urban wastewater management, planning and treatment.

Table 5 - Market size for water requirement for different uses (in Billion Cubic Meters) in coming years:

Sr No.	Uses	Scenario (2025)	Scenario (2050)
1	Irrigation	611	807
2	Domestic	62	111
3	Industries	67	81
4	Power	33	70
5	Others	70	111
Total		843	1,180

Key performance indicators for water supply management in India:

The GoI in partnership with States is implementing Jal Jeevan Mission (JJM). At the time of the announcement of the JJM, only 17% of the households were reported to have tap connections. However, as on October 20, 2023, post implementation of the JJM, 70% of the households are reported to have tap water supply in their homes.

WASTE WATER MANAGEMENT

According to the Central Pollution Control Board (CPCB), the estimated wastewater generation was almost 39,600 Million liters per day (MLD) in rural regions, while in urban regions it was estimated to be 72,368 MLD for the year 2020-21. The estimated volume in the urban cities is almost double than that of the rural regions because of the availability of more water for sanitation which has improved the standard of living.

Clean Ganga Mission

National Mission for Clean Ganga (NMCG) was registered as a society on 12th August 2011 under the Societies Registration Act 1860. It acted as implementation arm of National Ganga River Basin Authority (NGRBA) which was constituted under the provisions of the Environment (Protection) Act (EPA), 1986. The Act envisages five tier structure at national, state and district level to take measures for prevention, control and abatement of

Roads

India boasts the world’s second-largest road network, stretching over a staggering 6.33 million kilometres (kms) as of FY 2022-23. This extensive network encompasses various types of roads, including National Highways, Expressways, State Highways, Major District Roads, Other District Roads, and Village Roads. This road network plays a crucial role in transporting 64.5 percent of all goods and 90 percent of passenger traffic within the country. Traditionally, the Government has been the primary investor in the road sector. However, to promote private sector involvement, the Ministry has formulated comprehensive policy guidelines for private sector participation in National Highways development.

India’s National Highways alone span a total length of 1.44 lakh kms as of FY 2022-23, with their development overseen by the Government of India. The government has undertaken significant initiatives to upgrade and fortify these highways through various phases of the National Highway Development Projects (NHDP). This momentum continues with the umbrella program of Bharatmala Pariyojana Phase – I and other associated schemes and projects.

Source: Ministry of Road Transport and Highway

The construction of highways has shown robust growth in recent years, ranging from 10,500 to 11,000 kilometers. With the exception of the current financial year (FY 2024), the government's highway awards have also remained healthy. The length of national highways has increased significantly from 91,287 kilometers in FY 2014 to 144,995 kilometers in FY 2023, representing a growth of 5.3 percent compounded annually.

In 2017, the Government of India launched the Bharatmala Pariyojana with the objective of enhancing transportation efficiency by establishing 50 national corridors and connecting 550 districts in the country through NH linkages. The Bharatmala Pariyojana is being implemented in two phases, I and II.

Under phase I, a total of 34,800 kilometers of NH will be developed, with 76 percent of projects (26,418 kilometers) already awarded as of December 2023. The remaining projects will be awarded over the next two years. Phase II will involve awarding another 30,200 kilometers of projects.

The government, in collaboration with private entities, is also undertaking numerous road projects using various models such as EPC, BOT, and HAM. To date, the government has effectively implemented over 60 road projects valued at over USD 10 billion under the hybrid annuity (HAM) model. Furthermore, a significant number of projects are being awarded to private players under the Build, Operate, and Transfer (BOT) model. The Government is also dedicated to revitalizing the BOT model for road projects, aiming to make it more investor-friendly and appealing for private partnerships⁴.

In the Union budget 2022-23, the Government budgeted to incur higher expenditure towards road construction. Wherein, the Central Government made the highest ever outlay of ₹1,990 Billion (compared to the estimated expenditure of ₹1,310 Billion for 2021-22).

Overall, the Union Budget for 2023-24 depicted higher focus on infrastructure. The budget plan aims for multi-modal logistics facilities and connectivity systems under the PM Gati Shakti. For infra push, financial assistance of ₹1,300 Billion interest free loans for 50 years has been allocated to states from the Centre. Through this, the Government is planning to generate employment opportunities and augurs well for the Roads sector.

In addition, ₹111 Trillion of investments have been projected in infrastructure projects for FY20-FY25 by the Task Force on National Infrastructure Pipeline (NIP), with ~18% of the targeted investment expected to be made in the road sector in India.

The National Steel Policy, 2017 envisage 300 MTPA of production capacity by 2030-3. To achieve this steel capacity build-up of 300 MTPA by 2030, India would need to invest Rs. 10 lakh crore (US\$ 156.08 billion) by 2030-31.

Indian Steel industry is mainly dominated by major players like SAIL from PSU and private sector players like Arcelor Mittal, Nippon Steel, Tata Steel, JSW Steel etc.

- 1) SAIL is planning to increase their production capacity from 19.51 MTPA to 35.65 MTPA with investment around one Lakhs Crores.
- 2) Arcelor Mittal and Nippon Steel Corp.'s joint venture steel firm in India, announced a plan to expand its operations in the country by investing ~Rs. 1 trillion (US\$ 13.34 billion) over 10 years.
- 3) Tata Steel is planning to expand its annual capacity in India from 34 MTPA to 55 MTPA by 2030.
- 4) 67 applications from 30 companies have been selected under the Production Linked Incentive (PLI) Scheme for Specialty Steel. This will attract committed investment of Rs. 42,500 crore (US\$ 5.19 billion) with a downstream capacity addition of 26 million tonnes and employment generation potential of 70,000.
- 5) JSW Steel, part of the \$23-billion JSW Group, is establishing a greenfield complex in the industrial city of Paradip that will include a steel plant with a production capacity of 13.2 million tonnes per annum (mtpa) as well as a cement manufacturing unit. The investment will be in phases.
- 6) JSW Utkal Steel Limited to enhance the capacity of its proposed integrated steel enhance the capacity of its proposed integrated steel plant at Jatadhar in Jagatsinghpur district from 12 MTPA (million tons per annum) to 24 MTPA.

Mine Development

The future of mining is underground, not only because metals and minerals close to the surface are increasingly rare, but because underground mines have a significantly lower environmental footprint. Further open cast mining is being discouraged on account of environmental concerns.

The scope for new mining capacities in iron ore, coal, bauxite and rare minerals considerable opportunities for future discoveries of sub-surface deposits and continue to provide lucrative business opportunities for steel, zinc, and aluminium producers. Considering the demand potential for deep shaft mining in India the opportunities under this segment is very good.

BUSINESS PROCESS

We acquire business through tender process largely and some by direct enquiries. A step by step explanation of the Tender Process is given below:

Tender Enquiries

Tenders / Enquiries are sourced from / through

- i. Direct Enquiries
- ii. E-Portals of State & Central Government
- iii. Enquiry from known sources
- iv. Tenders from registered Portals

Check Tender Criteria and Scope of Work

After receipt of the Tender / Enquiries / RFQ (Request for Quotations), the scope of the works is reviewed along with the Pre-Qualifications for Technical and Commercial Conditions. If the PQ is ascertained, a Preliminary Risk analysis and Mitigation Strategy is conducted with the available inputs in the enquiry / Tender. Accordingly, the Decision to Bid or Not is taken in line with our tender screening strategy. If the decision to the bid is “NO”, then the details of this Tender / Enquiry is transferred to Archive for future reference. If the decision to bid is “YES” the RFQ along with technical specification is circulated to various internal departments concerned. Subsequently the feedback from each department is compiled and used for the pre-bid discussions with the Client / their PMC.

Start Tender Preparation including tender document review, financial proposal, technical proposal, preparing a detailed response.

After receiving the reply from the Client for the queries raised in the Pre-bid meeting, the Preparation of Bill of Quantity (BOQ) for cost estimation is done. For preparing the BOQ, we shall use the services of internal resources OR outsourced to an external agency OR from the Technology Provider depending upon the requirement. If to be outsourced to an external agency or a technology provider is required for the execution, an MoU with External Engineering Agency or Technology Provider is signed off.

Tender Document Review

The approach for the cost estimation or the Pricing are Getting Offers from Vendors, Suppliers & Contractors for the BOQ generated by the engineering team / agency. If required, a Prebid Agreement is signed with Critical Equipment suppliers for best pricing. We make provisions for Contingencies for both BOQ as well as the unforeseen difficulties during the execution of the project. Contingency for the cost of the materials / equipment also is considered if there is no provision for the Price Variation in the Tender / Enquiry. Subsequently a Final Risk analysis and Mitigation Strategy is conducted internally. After the cost estimation done, an Internal Tender Committee Meeting (TCM) to Finalise Bid Value is called for. All the assumptions and considerations are discussed in the TCM and the final value is arrived at.

Submission of documents on Portal which includes contract negotiations and award

All the required Techno commercial documents required for the submission of the BID is prepared and will be submitted on the bid submission date mentioned in the enquiry / tender or as per the requirement of the Client. Subsequently the Client and their PMC will carry out Post Bid Techno Commercial Discussion where in their final requirements will be discussed along with the deviations / exclusions considered by us in the BID documents. Accordingly, the client will ask the resubmit the commercial price bid. Negotiation / Finalisation of proposal / Tender / T & C are also carried out.

Contract Award

Meanwhile the Project Manager, Construction Manager and other Key personnel for the project is ear marked.

BUSINESS EXECUTION ACTIVITIES

A detailed description of the Execution of the Business Activities starting from the receipt of the award for the Contract.

This is a niche segment and large number of projects in this segment are available across India.

The large scale, complex and high value projects which are awarded by the various Central Government and State Government agencies, typically involve a competitive bidding process which involves certain pre qualifications requirements necessary to enter the Competitive bidding process. The primary competition between the Companies which qualify for a particular project is based on price viz the ability of the Company to execute the projects at lowest cost relatively to the other Companies. Across Despite our history of successfully implementing large-scale engineering and construction projects, some of our competitors may be more experienced in the development and operation of EPC contracts. 4) PM Gati Shakti aligned Infra projects – Outlay 1 lakh Cr.

Traditionally, there was lack of coordination between different Departments, for example, once a road was constructed, other agencies dug up the constructed road again for activities like laying of underground cables, gas pipelines etc. This not only caused great inconvenience but was also a wasteful expenditure. To address this, efforts were made to increase coordination so that all cables, pipelines etc. could be laid simultaneously.

Prime Minister launched PM Gati Shakti - National Master Plan for Multi-modal Connectivity, essentially a digital platform to bring 16 Ministries including Railways and Roadways together for integrated planning and coordinated implementation of infrastructure connectivity projects. The multi-modal connectivity will provide integrated and seamless connectivity for movement of people, goods and services from one mode of transport to another. It will facilitate the last mile connectivity of infrastructure and reduce travel time for people.

Rural areas contribute around 46% to the country's net domestic product and employ 70% of the total workforce. Enhanced reach to rural economies & development of SMART cities will quickly take centre stage in creating employment opportunities for India's youth.

ADB signs USD 125 million for developing Coimbatore, Madurai and Thootukudi in Tamil Nadu. The Centre and Asian Development Bank (ADB) on Tuesday signed a \$125 million loan to develop climate-resilient sewage collection and treatment, and drainage and water supply systems in three cities in the state of Tamil Nadu.

C. The audit report for the year ended March 31, 2022 included the below paragraphs:

(i) Material Uncertainty Related to Going Concern:

We draw attention to Note 4 (e) to the consolidated financial statements, which states that the Company has incurred a net loss of Rs. 26,370.37 Lakhs during the year ended March 31, 2022 and as of that date has accumulated losses aggregating to Rs. 2,15,105.50 Lakhs which has resulted in substantial erosion of its net worth. Further, the COVID-19 pandemic has also impacted the operations resulting in delay of collection relating to project dues. These events or conditions indicates that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. However, as stated in the note, considering the restructuring plan for the borrowings, infusion of additional equity subsequent to the year end by the investor and Management's plans to meet financial obligations in foreseeable future out of the cash flows from execution of the pipeline of orders in hand, future business plans, non-fund based facilities, and realisation of trade receivables, the consolidated financial statements of the Company for the year ended March 31, 2022 have been prepared on a going concern basis. Our opinion is not modified in respect of this matter.

(ii) Emphasis of Matter:

We draw attention to Note 43 to the Consolidated financial statements which states that the Management has made an assessment of the impact of Covid-19 on the Company's operations, financial performance and position as at and for the year ended March 31, 2022 and accordingly recognised an impairment loss of Rs. 6,361.26 Lakhs (March 31, 2021: Rs. 1,149.11 Lakhs) on financial assets and contract assets to reflect the business impact arising from the COVID 19 pandemic. Our opinion is not modified in respect of this matter.

(iii) Other Matters:

We did not audit the financial statements of one subsidiary, whose financial statements reflect total assets of Rs.15,356.23 Lakhs as at March 31, 2022, total revenues of Rs.2,885.01 Lakhs and net cash flows amounting to Rs.34.40 Lakhs for the year ended on that date, as considered in the consolidated financial statements. The consolidated financial statements also include the Group's share of net loss of Rs. 1,469.36 Lakhs for the year ended March 31, 2022, as considered in the consolidated financial statements. The financial statements have been audited by other auditors whose reports have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of this subsidiary and our report in terms of sub-section (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiary, is based solely on the reports of the other auditors.

6. Based on our examination and according to the information and explanations given to us, we report that the Restated Consolidated Financial Information:

Due to the non-availability of sufficient appropriate audit evidence to corroborate management's assessment that sufficient taxable profits will be available in the future against which such unabsorbed business losses can be utilised as required by Ind AS 12: Income taxes, we are unable to comment on any adjustments that may be required to the carrying value of the aforesaid DTA on the Statement for the quarter and year ended March 31, 2024. Due to unavailability of sufficient appropriate audit evidence to corroborate management's assessment that sufficient taxable profits will be available in the future against which such unabsorbed business losses can be utilised as required by Ind AS 12 on Income taxes, we are unable to ascertain the extent to which the deferred tax asset can be utilized. (Refer Note 43B of the consolidated financial statements).
 - Contract Assets (Non-Current) include Rs. 7,351.90 Lakhs (Net of provisions amounting to Rs. 926.98 Lakhs) (March 31, 2022: Rs. 3,956.02 Lakhs) and Trade Receivables (Non-Current) include Rs. 575.21 Lakhs (Net of provisions amounting to Rs. 82.99 Lakhs) relating to dues on projects which are not progressing on account of statutory delays faced by the customer. The Restated Consolidated Financial Information has been compiled by the Management from:

The audited consolidated IND AS financial statements as at and for the year ended 31 March 2024, 31 March 2023 & 31 March 2022 prepared in accordance with the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Companies Act, 2013, read with Companies (Indian Accounting Standards) Rules, 2015 (as amended) and other relevant provisions of the Act.

(a) Statement of Compliance with Ind AS

The Company's financial statements have been prepared in accordance with the provisions of the Companies Act, 2013 and the Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 and amendments thereof issued by Ministry of Corporate Affairs in exercise of the powers conferred by section 133 of the Companies Act, 2013. In addition, the guidance notes/announcements issued by the Institute of Chartered Accountants of India (ICAI) are also applied except where compliance with other statutory promulgations require a different treatment.

(b) Basis of measurement

The financial statements have been prepared on a historical cost convention on accrual basis, except certain financial assets and liabilities measured at fair value (Refer Accounting Policy No. 2.9 on financial instruments).

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. The normal operating cycle of the entity for Construction contracts is the duration of 2 to 3 years depending on each contract.

(c) Presentation of financial statements

The Balance Sheet and the Statement of Profit and Loss are prepared and presented in the format prescribed in the Schedule III to the Companies Act, 2013 ("the Act"). The statement of cash flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash flows". The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the financial statements along with the other notes required to be disclosed under the notified Accounting Standards and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Amounts in the financial statements are presented in Indian Rupees in Lakhs rounded off to two decimal places as permitted by Schedule III to the Companies Act, 2013. Per

share data are presented in Indian Rupees to two decimal places.

(d) **Use of estimates**

The preparation of financial statements in conformity with Ind AS requires the Management to make estimate and assumptions that affect the reported amount of assets and liabilities as at the Balance Sheet date, reported amount of revenue and expenses for the year and disclosures of contingent liabilities as at the Balance Sheet date. The estimates and assumptions used in the accompanying financial statements are based upon the Management's evaluation of the relevant facts and circumstances as at the date of the financial statements. Actual results could differ from these estimates. Estimates and underlying assumptions are reviewed on a periodic basis. Revisions to accounting estimates include useful lives of property, plant and equipment & intangible assets, allowance for expected credit loss, future obligations in respect of retirement benefit plans, expected cost of completion of contracts, fair value measurement, etc. Difference, if any, between the actual results and estimates is recognised in the period in which the results are known. Refer Note 3 for detailed discussion on estimates and judgments.

(e) **Interests in Joint Operations**

When the Company has joint control of the arrangement based on contractually determined right to the assets and obligations for liabilities, it recognises such interests as joint operations. Joint control exists when the decisions about the relevant activities require unanimous consent of the parties sharing the control. In respect of its interests in joint operations, the Company recognises its share in assets, liabilities, income and expenses line-by-line in the standalone financial statements of the entity which is party to such joint arrangement which then becomes part of the consolidated financial statements of the Group when the financial statements of the Holding Company and its subsidiaries are combined for consolidation.

2.2 Fair value measurement

The Company maintains accounts on accrual basis following the historical cost convention, except for certain financial instruments that are measured at fair value in accordance with Ind AS . The carrying value of all the items of property, plant and equipment as on date of transition is considered as the deemed cost.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- ▶ In the principal market for the asset or liability, or
- ▶ In the absence of a principal market, in the most advantageous market for the asset or liability accessible to the Company.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. The Company's management determines the policies and procedures for fair value measurement.

Fair value measurements under Ind AS are categorised as below based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety:

- ▶ Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the company can access at measurement date;
- ▶ Level 2 inputs are inputs, other than quoted prices included in level 1, that are observable for the asset or liability, either directly or indirectly; and
- ▶ Level 3 inputs are unobservable inputs for the valuation of assets/liabilities

2.3 Revenue Recognition

A. The Company recognises revenue from contracts with customers when it satisfies a performance obligation by transferring promised good or service to a customer. The revenue is recognised to the extent of transaction price allocated to the performance obligation satisfied. Performance obligation is satisfied over time when the transfer of control of asset (good or service) to a customer is done over time and in other cases, performance obligation is satisfied at a point in time. For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring good or service to a customer excluding amounts collected on behalf of a third party. Variable consideration is estimated using the expected value method or most likely amount as appropriate in a given circumstance.

Payment terms agreed with a customer are as per business practice and there is no financing component involved in the transaction price. Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in Statement of Profit and Loss immediately in the period in which such costs are incurred.

Incremental costs of obtaining a contract, if any, and costs incurred to fulfil a contract are amortised over the period of execution of the contract in proportion to the progress measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Significant judgments are used in:

1. Determining the revenue to be recognised in case of performance obligation satisfied over a period of time; revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.
2. Determining the expected losses, which are recognised in the period in which such losses become probable based on the expected total contract cost as at the reporting date.

B. Revenue from construction contracts/project related activity and contracts for supply/commissioning of complex plant and equipment is recognised as follows:

Fixed price contracts: Contract revenue is recognised only to the extent of cost incurred till such time the outcome of the job cannot be ascertained reliably subject to

condition that it is probable the such cost will be recoverable . When the outcome of the contract is ascertained reliably, contract revenue is recognised at cost of work performed on the contract plus proportionate margin, using the percentage of completion method. Percentage of completion is the proportion of cost of work performed to date , to the total estimated contracts cost.

The estimated outcome of a contract is considered reliable when all the following conditions are satisfied:

- (i) The amount of revenue can be measured reliably;
- (ii) It is probable that the economic benefits associated with the contract will flow to the company;
- (iii) The stage of completion of the contract at the end of the reporting period can be measured reliably; and
- (iv) The costs incurred or to be incurred in respect of the contract can be measured reliably.

Expected loss, if any, on a contract is recognised as expense in the period in which it is foreseen, irrespective of the stage of completion of the contract.

For contracts where progress billing exceeds the aggregate of contract costs incurred to-date and recognised profits (or recognised losses, as the case may be), the surplus is shown as the amount due to customers. Amounts received before the related work is performed are disclosed in the Balance sheet as a liability towards advance received. Amounts billed for work performed but yet to be paid by the customer are disclosed in the Balance sheet as trade receivables. The amount of retention money due from customers within the next twelve months are classified under other current assets as Trade Receivable.

Revenue from contracts from rendering engineering design services and other services which are directly related to construction of an asset is recognised on the same basis as stated in (B) above.

Other Operational Revenue

Other Operational Revenue represents income earned from activities incidental to the business and is recognized when the right to receive income is established as per the terms of contract.

Other Income

Interest income is recognised on a basis of effective interest method as set out in Ind AS 109, Financial Instruments, and where no significant uncertainty as to measurability or collectability exists.

Dividend income is accounted in the period in which the right to receive the same is established.

Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably.

2.4 Taxes

Tax expense for the year, comprising current tax and deferred tax, are included in the determination of the net profit or loss for the year.

(a) Current income tax

Current tax assets and liabilities are measured at the amount expected to be recovered or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the year end date. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

The company has not opted to exercise the option under section 115BAA of the income tax 1961, as introduced by the taxation laws (Amendment) ordinance, 2019 and decided to continue with the existing rate of tax for the purpose of deferred tax computation.

(b) Deferred tax

Deferred income tax is provided in full, using the balance sheet approach, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in financial statements. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss). Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the year and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Current and deferred tax is recognized in Statement of Profit and Loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

2.5 Exceptional Items

An item of income or expense which by its size, type or incidence requires disclosure in order to improve an understanding of the performance of the company is treated as an exceptional item and the same is disclosed in the notes to accounts.

2.6 Impairment of non-financial assets

The Company assesses at each year end whether there is any objective evidence that a non financial asset or a group of non financial assets is impaired. If any such indication exists, the Company estimates the asset's recoverable amount and the amount of impairment loss.

An impairment loss is calculated as the difference between an asset's carrying amount and recoverable amount. Losses are recognized in Statement of Profit and Loss and reflected in an allowance account. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, then the previously recognised impairment loss is reversed through Statement of Profit and Loss.

The recoverable amount of an asset or cash-generating unit (as defined below) is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash in flows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit").

2.7 Provisions and contingent liabilities

Provisions are recognized when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Provisions, contingent liabilities and contingent assets are reviewed at each Balance Sheet date. Where the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under such contract, the present obligation under the contract is recognised and measured as a provision.

2.8 Commitments

Commitments are future liabilities for contractual expenditure, classified and disclosed as follows:

- a) estimated amount of contracts remaining to be executed on capital account and not provided for;
- b) uncalled liability on shares and other investments partly paid;
- c) funding related commitment to subsidiary, associate and joint venture companies; and
- d) other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.

2.9 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(a) Financial assets

(i) Initial recognition and measurement

At initial recognition, financial asset is measured at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the Statement of Profit and Loss.

(ii) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

- a) at amortized cost; or
- b) at fair value through other comprehensive income; or
- c) at fair value through profit or loss.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. Interest income from these financial assets is included in finance income using the effective interest rate method (EIR).

Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognized in Statement of Profit and Loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in OCI is reclassified from equity to Statement of Profit and Loss and recognized in other gains/ (losses). Interest income from these financial assets is included in other income using the effective interest rate method.

Fair value through profit or loss: Assets that do not meet the criteria for amortized cost or FVOCI are measured at fair value through profit or loss. Interest income from these financial assets is included in other income.

The company has currently exercised the irrevocable option to present in Other comprehensive Income, subsequent changes in the Fair value of Equity Instruments. Such an election has been made on instrument-by- instrument basis. The classification is made on initial recognition and is irrevocable.

(iii) **Impairment of financial assets**

In accordance with Ind AS 109, Financial Instruments, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on financial assets that are measured at amortized cost and FVOCI.

For recognition of impairment loss on financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If in subsequent years, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on 12 month ECL.

Life time ECLs are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12 month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the year end.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e. all shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider all contractual terms of the financial instrument (including prepayment, extension etc.) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument.

ECL impairment loss allowance (or reversal) recognized during the year is recognized as income/expense in the statement of profit and loss. In balance sheet, ECL for financial assets measured at amortized cost is presented as an allowance, i.e. as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

(iv) **Derecognition of financial assets**

A financial asset is derecognized only when

- a) the rights to receive cash flows from the financial asset is transferred or
 - b) retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.
- Where the financial asset is transferred then in that case financial asset is derecognized only if substantially all risks and rewards of ownership of the financial asset is transferred. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognized.

(b) **Financial liabilities**

(i) **Initial recognition and measurement**

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss and at amortized cost, as appropriate. All financial liabilities are recognized initially at fair value and, in the case of borrowings and payables, net of directly attributable transaction costs.

(ii) **Subsequent measurement**

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on liabilities held for trading are recognized in the Statement of Profit and Loss.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognized in Statement of Profit and Loss when the liabilities are derecognized as well as through the EIR amortization process. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the Statement of Profit and Loss.

(iii) **Derecognition**

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the Statement of Profit and Loss as finance costs.

(c) **Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

3 Significant accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future years.

4 Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the year end date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

(a) Taxes

The extent to which deferred tax assets can be recognized is based on an assessment of the probability that future taxable income will be available against which the deductible temporary differences and tax loss carryforwards can be utilized. In addition, significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

(b) Construction Contracts

Recognizing construction contract revenue requires significant judgement in determining actual work performed and the estimated costs to complete the work, provision for rectification costs, variation claims etc

(c) Going Concern:

As on March 31, 2022:

The Company has incurred net loss of ₹. 26,370.37 Lakhs during the year ended March 31, 2022 and as of that date has accumulated losses aggregating ₹. 2,15,105.5 Lakhs which has resulted in substantial erosion of its net worth. The company is in default to its lenders and the lenders have categorised the Company's account as Non-Performing Asset and one of the financial creditor filed an NCLT case against the company. Resolution Plan submitted in accordance with the requirement set out in the circular issued by the Reserve Bank of India No RBI/20119/203DBR.No>BP.BC.45/21.04.048./2018-19 dated June 07, 2019 has been approved by the lenders with super majority on March 25, 2022. With these positive developments by implementing the resolution plan, underlying strength of the Company's business plans and future growth outlook as assessed with existing order book, the credit profile of the Company, would improve resulting in it being able to meet its obligations in due course of time. Accordingly, these financial statement are prepared on a going concern basis.

Risks associated with plan provisions

Investment Risk	The probability or likelihood of occurrence of losses relative to the expected return on any particular investment.
Interest risk	The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability.
Salary Escalation Risk	The present value of the defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.
Demographic Risk	The Company has used certain mortality and attrition assumptions in valuation of the liability. The Group is exposed to the risk of actual experience turning out to be worse compared to the assumption.

In respect of the plan in India, the most recent actuarial valuation of the present value of the defined benefit obligation were carried out as at March 31, 2024 by Mr. Jayaraman, Fellow of the Institute of Actuaries of India. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the projected unit credit method.

53 Financial risk management objectives and policies

The Company is exposed to various financial risks. These risks are categorized into market risk, credit risk and liquidity risk. The Company's risk management is coordinated by the Board of Directors and focuses on securing long term and short term cash flows. The Company does not engage in trading of financial assets for speculative purposes.

(A) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: Interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include borrowings and financial instruments.

(i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's outstanding debt in local currency is on fixed rate basis and hence not subject to interest rate risk.

(ii) Foreign currency risk

The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (when revenue or expense is denominated in a different currency from the Company's functional currency).

The net exposure to foreign currency in respect of recognized financial assets, recognized financial liabilities and derivatives is as follows:

a) Forward exchange contracts entered into by the Company and outstanding as on March 31, 2024 - Nil. (March 31, 2023: Nil)

Foreign currency sensitivity analysis:

Movement in the functional currencies of the various operations of the Company against major foreign currencies may impact the Company's revenues from its operations. Any weakening of the functional currency may impact the Company's import payments and cost of borrowings.

The foreign exchange rate sensitivity is calculated for each currency by aggregation of the net foreign exchange rate exposure of a currency and a parallel foreign exchange rates shift in the foreign exchange rates of each currency by 2%, which represents Management's assessment of the reasonably possible change in foreign exchange rates.

The sensitivity of profit or loss to changes in the exchange rates arises mainly from foreign currency denominated financial instruments. The following table details the Company's sensitivity movement in the increase / decrease in foreign currencies exposures (net):

 - Non-Current Contract Assets include overdue balances of Rs. 6,959.44 lakhs (net of provisions amounting to Rs. 926.98 lakhs) and Non-Current Trade Receivables include Rs. 575.21 lakhs (net of provisions amounting to Rs. 82.99 lakhs) as on March 31, 2024, relating to dues on projects which have been stalled due to delays in obtaining approvals from the regulatory authorities. Due to the non-availability of sufficient appropriate audit evidence to corroborate management's assessment of the recoverability of the said balances, we are unable to comment on the carrying value of these non-current Contract Assets and Trade Receivables, and the consequential impact if any, on the consolidated financial statements for the year ended March 31, 2024. (Refer to Note 8.1 and Note 11.1 of the Consolidated Financial Statements)

Qualified Opinion on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

According to the information and explanations given to us and based on our audit, the following material weaknesses have been identified in the operating effectiveness of the Group's internal financial controls with reference to consolidated financial statements as at March 31, 2024:

- Provisioning of expected credit loss against non-current contract assets and trade receivables which are outstanding for a substantial period of time, which could potentially result in the group not recognizing a provision against the said assets.
 - Assessment of future taxable profits which could result in recognition of excess deferred tax asset which the group may not be able to utilize for set-off against sufficient future taxable profits.
- A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control with reference to consolidated financial statements, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.
- In our opinion, and to the best of our information and according to the explanations given to us, the Holding company and its subsidiary company, have, in all material respects, maintained adequate internal financial controls with reference to consolidated financial statements as of March 31, 2024, based on the internal financial control with reference to consolidated financial statements criteria established by respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI") and except for the possible effects of the material weaknesses described below on the achievement of the objectives of the control criteria, the internal financial controls with reference to consolidated financial statements of the Holding company and its subsidiary company, were operating effectively as of March 31, 2024.

We have considered the material weaknesses identified and reported above in determining the nature, timing, and extent of audit tests applied in our audit of the March 31, 2024 consolidated financial statements of the Company, and these material weaknesses have affected our opinion on the consolidated financial statements of the Company for the year ended on that date and we have issued a qualified opinion on the consolidated financial statements.

Financial Year ended 31 March 2023

- a) Qualification:
- The carrying value of Deferred Tax Asset (DTA) include an amount of Rs. 33,289.92 Lakhs (March 31, 2022: Rs. 35,645 Lakhs) which is recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management's assessment that sufficient taxable profits will be available in the future against which such unabsorbed business losses can be utilised as required by Ind AS 12 on Income taxes, we are unable to ascertain the extent to which the deferred tax asset can be utilized. (Refer Note 43B of the consolidated financial statements).
 - Contract Assets (Non-Current) include Rs. 7,351.90 Lakhs (Net of provisions amounting to Rs. 926.98 Lakhs) (March 31, 2022: Rs. 3,956.02 Lakhs) and Trade Receivables (Non-Current) include Rs. 575.21 Lakhs (Net of provisions amounting to Rs. 82.99 Lakhs) relating to dues on projects which are not progressing on account of statutory delays faced by the customer. In the absence of positive development in this matter till date, there is uncertainty on the amount that would be recoverable by the Company. Further, we do not have sufficient appropriate audit evidence to corroborate management's assessment of recoverability of the said amounts. Accordingly, we are unable to comment on the carrying value of above mentioned Contract Asset (Non-Current) and Trade Receivables (Non-Current) and the impact if any, on account of non-provisioning of the said balances on the consolidated financial statements. (Refer to Note 8.1 and Note 11.1 of the Consolidated Financial Statements)
- These matters were also qualified in our report on the consolidated Ind AS financial statements for the year ended March 31, 2022

Qualified Opinion on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

According to the information and explanations given to us and based on our audit, the following material weaknesses have been identified in the operating effectiveness of the Company's internal financial controls with reference to consolidated financial statements as at March 31, 2023:

- Provisioning of expected credit loss against contract assets and receivables which are outstanding for a substantial period of time, which could potentially result in the Company not recognizing a provision for the said assets.
 - Assessment of future taxable profits which could result in recognition of excess deferred tax asset which the Company may not be able to utilize for set-off against sufficient taxable profits.
- A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control with reference to consolidated financial statements, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.
- In our opinion, and to the best of our information and according to the explanations given to us, the Holding Company, its subsidiary Company, have in all material respects, maintained adequate internal financial controls with reference to consolidated financial statements as of March 31, 2023, based on the internal financial control with reference to consolidated financial statements criteria established by respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI") and except for the possible effects of the material weaknesses described below on the achievement of the objectives of the control criteria, the internal financial controls with reference to consolidated financial statements of the Holding Company were operating effectively as of March 31, 2023.

We have considered the material weaknesses identified and reported below in determining the nature, timing, and extent of audit tests applied in our audit of the March 31, 2023 consolidated financial statements of the Company, and these material weaknesses have affected our opinion on the consolidated financial statements of the Company for the year ended on that date and we have issued a qualified opinion on the consolidated financial statements

b) **Emphasis of Matter:**

We draw attention to the following matters in the Notes to the consolidated financial statements:

- a) Note 42.1(i) of the consolidated financial statements, which describes the implementation of Resolution Plan entered into with the lenders dated June 22, 2022, wherein interest waiver, and the difference between the carrying amounts of the facilities before restructuring and the fair values of the new facilities has been recognised as income and disclosed under Exceptional items in the statement of profit and loss in accordance with INDAS 109 - Financial Instruments.
- b) Note 42.1(ii) to the consolidated financial statements, which states that the management written off an amount of Rs. 5,819.69 Lakhs towards amounts due on account of work performed on a contract entered into with a customer which was subsequently wrongfully terminated before the completion of the contract due to certain issues at the contract site. Legal disputes / arbitration proceedings have been initiated during the period in respect of projects with the customers. Our opinion is not modified in respect of these matters.

Financial Year ended 31 March 2022

c) **Qualification:**

i) The carrying value of Deferred Tax Asset (DTA) include an amount of Rs. 35,645.00 Lakhs (March 31, 2021: Rs. 43,889.00 Lakhs) which is recognized on unabsorbed business losses. Due to unavailability of sufficient appropriate audit evidence to corroborate management's assessment on reasonable certainty of future taxable profits, as required by Ind AS 12- Income taxes and considering the current pandemic situation, we are unable to ascertain the extent to which the deferred tax asset can be utilized. (Refer Note 44 of the consolidated financial statements). This matter was also qualified in our report on the Consolidated financial statements for the year ended March 31, 2021.

ii) Contract Asset (Non-Current) include Rs. 3,956.02 Lakhs (Net of provisions amounting to Rs. 926.98 Lakhs) relating to project dues which is not progressing on account of Statutory delays faced by the Customer. In the absence of positive development in this matter till date, there is uncertainty on the amount that would be recoverable by the Company. Further, sufficient appropriate audit evidence to corroborate management's assessment of recoverability of the above said amount is not available. Accordingly, we are unable to comment on the carrying value of above-mentioned Contract Asset (Non-Current) and the impact if any, on account of non-provisioning of the said balance on the consolidated financial statements. (Refer to Note 08 of the consolidated Financial Statements)

Qualified Opinion on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

According to the information and explanations given to us and based on our audit, the following material weaknesses have been identified in the operating effectiveness of the Holding Company's internal financial controls with reference to financial statements as at March 31, 2022:

- a) Provisioning of contract assets which is outstanding for a substantial period of time, which could potentially result in the Company not recognizing a provision for the said assets.
- b) Assessment of future taxable profits which could result in recognition of excess deferred tax asset which the Company may not be able to utilize.

A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control with reference to financial statements, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

In our opinion, and to the best of our information and according to the explanations given to us, the Holding Company, have in all material respects, maintained adequate internal financial controls with reference to financial statements as of March 31, 2022, based on the internal control with reference to financial statements criteria established by respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI") except for the possible effects of the material weaknesses described above on the achievement of the objectives of the control criteria, the internal financial controls with reference to financial statements of the Holding Company were operating effectively as of March 31, 2022.

We have considered the material weaknesses identified and reported above in determining the nature, timing, and extent of audit tests applied in our audit of the March 31, 2022 consolidated financial statements of the Company, and these material weaknesses do not affect our opinion on the consolidated financial statements of the Company.

d) **Material Uncertainty Related to Going Concern**

We draw attention to Note 4 (e) to the standalone financial statements, which states that the Company has incurred a net loss of Rs. 26,370.37 Lakhs during the year ended March 31, 2022 and as of that date has accumulated losses aggregating to Rs. 2,15,105.50 Lakhs which has resulted in substantial erosion of its net worth. Further, the COVID-19 pandemic has also impacted the operations resulting in delay of collection relating to project dues. These events or conditions indicates that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. However, having regard to the restructuring plan for the borrowings, infusion of additional equity subsequent to the year and the Management's plans to meet financial obligations in foreseeable future out of the cash flows from execution of the pipeline of orders in hand, future business plans, non-fund based facilities, and realisation of trade receivables, the consolidated financial statements of the Company for the year ended March 31, 2022 have been prepared on a going concern basis. Our opinion is not modified in respect of this matter.

e) **Emphasis of Matter:**

We draw attention to Notes 43 to the consolidated financial statements which states that the Management has made an assessment of the impact of Covid-19 on the Company's operations, financial performance and position as at and for the year ended March 31, 2022 and accordingly recognised an impairment loss of Rs. 6,361.26 Lakhs (March 31, 2021: Rs. 1,149.11 Lakhs) on financial assets and contract assets to reflect the business impact arising from the COVID 19 pandemic. Our opinion is not modified in respect of this matter.

vii) According to the information and explanations given to us and based on our examination of financial ratios, ageing and expected date of realisation of financial assets and payment of liabilities, other information accompanying the standalone financial statements, our knowledge of the Board of Directors and management plans, we are of the opinion that a material uncertainty exists as on the date of audit report. However, the Company is capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. Further, as stated in the note 4 (e), considering the restructuring plan for the borrowings, infusion of additional equity subsequent to the year end by the investor and the Management's plans to meet financial obligations in foreseeable future out of the cash flows from execution of the pipeline of orders in hand, future business plans, non-fund based facilities, and realisation of trade receivables, the standalone financial statements of the Company for the year ended March 31, 2022 have been prepared on a going concern basis. We, however, state that this is not an assurance as to the future viability of the Company. We further state that our reporting is based on the facts up to the date of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the Company as and when they fall due.

However, on account of failure of our Company and Twarit Consultancy Services Private Limited to purchase the preference shares of Haldia, an arbitration was filed under the rules of the Singapore International Arbitration Centre. An award dated January 7, 2021 was passed in favour of the Complainant, directing our Company and Twarit Consultancy Services Private Limited to pay a sum of approximately, 19,854.11 lakhs.  - (i) the Complaint relates to an international arbitration award rendered by the Singapore International Arbitration Centre and the enforcement proceedings and appeal proceedings arising therefrom which are presently *sub judice* before the Hon’ble Madras High Court and the Hon’ble Supreme Court of India;

The Hon’ble High Court of Madras pursuant to an order granted an interim stay on the operation of the Order on condition that our Company shall deposit a sum of ₹ 50.00 lakhs as against the demand of Rs.175.00 lakhs in *toto*. SIAC vide their Order dated January 07, 2021 awarded damages jointly and severally against the Respondents to the tune of ₹ 19,854.11 lakhs and a sum of SGD 372,754.79 towards arbitration expenses (the “**Award**”). The payment was required to be made within two months from the date of the order and in connection with the same, the Respondents had already preferred a modification application in February 2024 before the Hon’ble Supreme Court. In the meanwhile, the Hon’ble Supreme Court vide its order dated May 17, 2024 *inter alia* directed the payment to be made on or before next date of hearing in the week commencing from July 29, 2024 and directed the appearance of directors of the Respondents before it. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2017 (“**FDI Circular 2017**”), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2017 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails. The Consolidated FDI Policy, issued by the DIPP, consolidates the policy framework in place as on August 27, 2017, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, erstwhile OCBs cannot participate in this Issue.
